Welcome to the 2007 edition of The Absolute Sound’s Editors’ Choice Awards, our annual Recommended Products list. On the following pages we present the gear that our editors and senior writers have selected as most worthy of purchase. These are the components we would buy ourselves or recommend to friends and family. Each product category is divided into separate subcategories defined by a price range, with components listed in order of ascending cost (though a few items, like cables and accessories, are listed alphabetically). Each recommendation is also accompanied by a capsule review, the original reviewer’s name, and the issue the review appeared. In a few cases a product may have been reviewed in one of our sister publications, The Perfect Vision or AVguide.com, or the review may be pending publication, or the product may not have been formally reviewed but earns a recommendation based on a writer’s extensive experience with it.

Given that this is the high end, where components generally have long lifespans, some of our recommendations look back several years. However, to be as up-to-date as possible, we’ve dropped some components that appeared on last year’s list, sometimes because they have been discontinued and sometimes because we’ve reconsidered the choice.

We have added Golden Ear (GE) and Product of the Year (PoY) symbols to those products that have won these awards, along with the year in which the awards were given. Keep in mind that some worthy products are so new to the list that they haven’t yet been nominated for awards.
PSB Alpha B1
$279
psbspeakers.com
Yet another “how-does-he-do-it?” loudspeaker from the prolific mind of Paul Barton. The new, more curvaceous Alpha combines mind-bending dynamics and rich mids in a speaker barely a foot tall. Even the midbass has power and pitch definition rarely found in this modest price range. Only the nebulous soundstaging is less than excellent.
Reviewed by Neil Gader, Issue 170

Epos ELS3
$329
musichallaudio.com
The Epos ELS3 strives to give you big sound from a small box, and does a much better job than most. With good midrange and treble clarity, superb three-dimensionality, and just enough upper-midbass weight to keep you from missing the lower frequencies that aren’t there.
Reviewed by Chris Martens, Issue 145

Usher S520
$400
usheraudio.com
Four things distinguish Usher’s S520 from run-of-the-mill, sub-$400 mini-monitors: a crisp and revealing treble, an unusually open and dynamic midrange, taut and surprisingly extended bass (no midbass hump here), and eye-popping build-quality. One caveat: The S520 needs lots of break-in, so be patient.
Reviewed by CM in AVgM, Issue 10

Focal 706V
$595
audioplusservices.com
Although nominally a bookshelf speaker, the Focal 706V delivers an oversized presentation, with the bass power, weight, and extension of a small floorstanding unit. Highly dynamic and visceral, it has a forward perspective that puts vocals right up front. Shines on rock, blues, and orchestral music. Highish sensitivity makes it an excellent choice for small rooms.
Reviewed by Robert Harley, Issue 173

Monitor Audio BR5
$599
monitoraudiosa.com
The BR5 is a two-and-a-half-way floorstanding speaker with good bass extension for its size, excellent articulation, and nice soundstaging. Not intended to fill stadiums, at moderate to loud levels it is one lightweight that performs like a serious middleweight.
Reviewed by Barry Willis, Issue 172

Silverline Minuet
$600
silverlineaudio.com
Don’t let its pint-sized dimensions fool you; the perky Minuet is unalloyed musicality with speed to burn, surprisingly robust dynamics, and (surprise!) some genuine low-frequency output. Don’t expect accurate orchestral scale or bass dynamics, but enjoy the “foo-yl” imaging.
Reviewed by NG, Issue 174

Mission Elegante e80
$799
mission.co.uk
Curvaceous and contemporary, the eleven-inch-tall e80 offers easy listening, good timbre, and bass extension that belies its size. Beautifully constructed with laminates and diffraction technology gleaned from Mission’s flagship, the Pilastro. Even without a subwoofer, a very satisfying mini.
Reviewed by NG, Issue 174

PSB T45/55
$799/$949
psbspeakers.com
As successors to the popular Image Series, the T45 and T55 had big shoes to fill. These small and mid-sized floorstanders do not disappoint. Both are well balanced tonally, with superior driver integration, excellent output capability, and a fair amount of extension. Soundstaging is merely adequate and the treble is coolish, but dynamics are gutsy and details well reproduced.
T45 reviewed by Jim Hannon, AVgM, Issue 11; T55 by NG, Issue 152

NHT Classic Three
$800
nnthifi.com
NHT’s Classic Threes are remarkably capable three-way stand-mount monitors. Featuring anodized-aluminum dome tweeters and midrange drivers, they offer greater resolution and better imaging than anything else in their class. Bass extends to about 45Hz—with excellent clarity and pitch definition. Honest almost to a fault, the Threes should be driven with smooth yet articulate amplifiers.
Reviewed by CM, Issue 169

KEF iQ7
$899
kef.com
A bit overripe in the bottom octaves, this three-way floorstander with Uni-Q coincident-driver technology otherwise exemplifies sonic value, with precision imaging, propulsive rhythmic drive, and high output-levels. Its attractive lute-shaped enclosure will be unobtrusive even in small dens and bedrooms.
Reviewed by NG in this issue

B&W CM1
$900
bwspeakers.com
Like many small speakers, this tiny, jewel-like mini-monitor trades bass extension and wide dynamics for midrange purity. Through the mids, the CM1 is magic, with a timbral realism, freedom from grain, palpability, and lack of coloration that many five-figure loudspeakers don’t deliver. Stunning on vocals and small-scale acoustic music.
Reviewed by RH, Issue 173

Quad 11L Active
$999
taigallc.com
With excellent frequency extension for their modest size and price point, these powered mini-monitors have a slight warmth that contributes to their uniquely intimate and cozy charm. Though touted as high-end multimedia speakers, the 11L Actives are capable of revealing both the prowess and limitations of the entire system upstream of them.
Guido Corona, review forthcoming

Quad 11L Active
$999
taigallc.com
With excellent frequency extension for their modest size and price point, these powered mini-monitors have a slight warmth that contributes to their uniquely intimate and cozy charm. Though touted as high-end multimedia speakers, the 11L Actives are capable of revealing both the prowess and limitations of the entire system upstream of them.

Magpeman MG12/QR
$1099
magnepan.com
This two-way quasi-ribbon planar brings you remarkably close to the best performance such designs are capable of. When properly placed—around three feet from walls—its clarity is...
addictive, with a wide, deep soundstage, and terrific transient speed. The MG12 performs satisfyingly down to about 40Hz; below that, some listeners may want a subwoofer.

**Reviewed by Sallie Reynolds, AVgM, Issue 2**

**Amphion Ion**

$1350

myquartet.com

From Finland, this quasi-nearfield specialist is a model of small-speaker transparency and soundstaging, boasting sensational image focus. If you don't plan on a subwoofer, the Ion will require some wall reinforcement to flesh out its sound. However, with inner detail and low-level resolution seemingly hardwired into this little speedster, it's an ideal speaker for premium audio in smaller rooms.

**Reviewed by NG, Issue 170**

**Revel Concerta F12**

$1498

revelspeakers.com

The Concerta F12's greatest strengths are extended bass response, a neutral tonal balance, midrange nuance, and wonderfully consistent voicing from top to bottom. Though it may not offer the last word in transparency or the nth degree of bass articulation, the Ion is easy to drive with real-world amps and always produces an inviting, well-balanced sound.

**Reviewed by Arnie Williams, Issue 157**

**Definitive Pro Cinema 1000**

$1649

definitivetech.com

The main, surround, and center-channel speakers in Definitive’s ProCinema 1000 system feature ridiculously good mid/bass drivers that would not seem out of place in, say, a good set of $4k floorstanders. Complementing them are tiny passive radiators that enhance bass and dynamics, plus Definitive’s crisp-sounding (some listeners find slightly too crisp) aluminum dome tweeters. Completing this value-packed system is one of Definitive’s traditionally strong powered subs.

**Reviewed by CM, Issue 168**

**Reference 3A Dulcet**

$1695

reference3A.com

True to its name, this Canadian bonbon produces smooth, melodic sound, and as a bonus is reasonably well balanced through the bass range. Its sonic character is such that it should happily partner with an even-less-than-sterling digital front end.

**Reviewed by Dick Olisher, Issue 171**

**Stirling Broadcast LS3/5a V2**

$1695

acousticsounds.com

Thanks to Derek Hughes's brilliant crossover, the Stirlings are proud descendants of their LS3/5a lineage. The tactile midrange, the projected presence, the warm upper bass, the stellar imaging, the deceptively large presentation, even the idiosyncrasies (that 1.2kHz peak) and limitations (no deep bass) are all back, as a legend gets a new lease on life.

**Reviewed by Paul Seydor, Issue 166**

**DALI IKON 6**

$1750

dali-usa.com

If power, substance, and clarity are important qualities to you, the DALI IKON 6 should be on your very short list. This speaker is easy to drive, effortlessly delivers the goods dynamically, and has a smooth overall balance. The midrange and treble are a touch forward, so match electronics with care.

**Reviewed by Robert E. Greene, Issue 164**

**Magnepan MG 1.6**

$1775

magenpan.com

Magnepan’s MG 1.6 is simply one of the great high-end speaker values. Its bass is well defined and tuneful down to a respectable 40Hz; its highs are sweet and a bit soft; its mids are magical. A music lover’s delight, it needs space and power to sound its best.

**Reviewed by Jonathan Valin, Issue 124**

**Quad 22L**

$1799

taigallic.com

According to JH, the 22L “comes closer to my beloved electrostats than any other full-range speakers with dynamic drivers I’ve heard under $2k.” Strengths include excellent lateral imaging, vivid three-dimensional soundstaging, very low distortion and coloration, and timbral accuracy. For even more dynamic oomph and deep bass extension, add Quad’s L-series subwoofer.

**Reviewed by Tom Martin, Issue 169**

**Tannoy Autograph Mini**

$1799

tannoy.com

“Easily the best desktop monitor I’ve heard,” says TM. These speakers aren’t going to fill a large room, but from 2 or 3 feet away they sound phenomenal. They may be expensive for their size and application, but how many other sub-$2000 audio products give you a solid glimpse of the state-of-the-art?

**Reviewed by JH, Issue 156**

**Quad L-ITE**

$1995

taigallic.com

One of the finest sub-$2k surround systems we’ve heard, characterized by lively and engaging mids, silky smooth highs, and nicely extended bass that offers terrific punch and clarity. Quad’s compact but surprisingly potent satellite and center-channel speakers are rounded out by what is perhaps the best subwoofer in this price class.

**Review forthcoming**

**Vandersteen 2CE Signature II**

$1995

vandersteen.com

This classic three-way floorstander delivers excellent top-to-bottom balance and engaging musicality. Moreover, Vandersteen’s baffle-less, time-and-phase-coherent design can suggest the spatial focus usually heard with planars. It benefits from bi-wiring and should be placed away from walls.

**Reviewed by Shane Buettner, Issue 139**

**PSB Platinum M2**

$1999

psbspeakers.com

The Platinum M2 shines in its ability to reproduce the weight, majesty, and complexity of every kind of music. Tonaly, the speaker is sure-of-foot through the midrange and well into the midbass. Highs are extended and neck-snappingly quick. When pushed too hard, however, the M2 betrays a trace of port overhang and some dryness from its aluminum tweeter.

**Reviewed by NG, Issue 145**
**LOUDSPEAKERS**

**Usher CP-6311**

$2100  
usheraudio.com  
The Usher CP-6311 is a two-way, time-and-phase-aligned bass-reflex tower offering smooth, extended highs, a clear, open midrange, and solid bass down to the upper-30Hz region. It can play loudly without losing its composure, is dynamically responsive, and images with a delightful sense of focus.  
Reviewed by CM, AVguide.com, Issue 147

**B&W 704**

$2200  
bwspeakers.com  
Clarity and control are chief among this two-way, vented floorstander’s sonic virtues, thanks to refinements derived from B&W’s acclaimed Nautilus 800 Series. Some may prefer more weight in the bottom end, but the 704’s limited LF extension (40Hz) is more than compensated for by sound that is remarkably quick, solid, and well defined.  
Reviewed by Sue Kraft, Issue 147

**DALI Mentor 2**

$2300  
dali-usa.com  
Falling midway between the IKON and Helicon lines, the stand-mounted Mentor 2 mates a single 6.5” mid/bass driver to DALI’s hybrid dome/ribbon tweeter module. Exceptional quick, clear, and free from overhang, it combines low tonal coloration and agile dynamics in a musically compelling blend.  
Reviewed by RH, Issue 174

**Totem Hawk**

$2450  
totemacoustic.com  
An overachiever at this price that communicates the soul and spirit of music, the Hawk has excellent tonal balance, tremendous presence, and prodigious soundstaging. As with other Totem loudspeakers, the Hawk trades a bit of bass extension for extraordinary midrange transparency and resolution. Needs a higher-powered amp.  
Reviewed by Peter Braverman, Issue 139

**Von Schweikert VR 2**

$2495  
vonschweikert.com  
A transmission-line tower featuring three forward-facing drivers plus a rear-firing “ambience-recovery” driver, the VR-2 offers deeply extended (mid-20Hz) bass, a midrange and treble whose clarity scales upward with that of associated electronics, and lively and expressive dynamics. When used judiciously, the ambience-recovery driver helps add depth to the soundstage.  
Reviewed by CM, AVguide.com

**Sonus Anima**

$2600  
immudiosound.com  
Although only thirteen inches tall, the Anima reveals all kinds of colors and details in the midbass and gives a very satisfying impression of low-frequency muscle. Delivers harmonics and speed that are more akin to a ribbon driver. Dynamics are slightly pinched with orchestral fireworks and the slight elevation of the lower treble adds whitish sparkle and detail, but overall this is a very serious speaker.  
Reviewed by NG, Issue 172

**Gallo Nucleus Reference 3.1**

$2995 ($3895 with optional subwoofer amp)  
roundsound.com  
Now in a slightly improved .1 configuration, the Nucleus offers some of the most focused imaging and three-dimensional soundstaging around. The transition from midrange to treble is smooth, and bass is clear and articulate, reaching down to 35Hz. Gallo also offers a 250Wpc supplemental subwoofer amp that co-drives the woofer along with your main amplifier, pushing bass response to 22Hz.  
Reviewed by CM, Issue 150

**Omega Speaker Systems Maxhemp**

$2995 (with matching veneered pedestals)  
omegaloudspeakers.com  
The Maxhemp is a ported three-way speaker (with additional whizzer cone) that uses a single 8” driver made out of hemp, potentially lending a whole new meaning to high fidelity. The whizzer cone may be a little whizzy in the upper mids, and the entire treble a bit ragged, but, from the upper bass through the mids, the Maxhemp sounds so finely detailed, so fast, so much of a piece, and so realistic it positively astonishes.  
JV, review forthcoming

**ProAc Studio 140**

$2995  
proac-loudspeakers.com  
Solid ProAc family values include a dazzling soundstage and riveting imaging. Singing with a musical authenticity that captures the excitement and electricity of the live event, the double-woofered Studio 140 also adds a slam-factor unheard of in ProAc models of yore. Its smidge of extra mid-treble sparkle seems additive.  
Reviewed by NG, Issue 168

**Spendor S8e**

$2999  
qsanddd.com  
Though neither the largest nor most expensive model in Spendor’s S Series, the S8e just might be the range’s best-sounding model. An heir to some of the great BBC monitor speakers of the past, the S8e offers glorious midrange treble and treble response, wide, deep soundstaging with excellent image height, plus “clean, clear, dramatic bass, even low bass.”  
Reviewed by SR, Issue 155

**Harbeth HL Compact 7ES-3**

$3295–$3795 (depending on finish)  
fidelisav.com  
Arguably the ne plus ultra of BBC two-way designs, with bass down to 46Hz, an essentially perfect midrange, and a top end that reproduces ambience fantastically. The 7ES-3 will play loud enough for serious music listeners (though not for headbangers). With respect to accuracy, neutrality, and natural tonal balance the 7 establishes for PS a new benchmark for compact two-ways.  
Reviewed by PS, Issue 155

**Sonus Faber Concerto Domus**

$3495  
sumikoaudio.net  
Sonus and “slam” are comfortable bedfellows in this deceptive two-way floorstander. Despite slight softening of transient information, the Concerto Domus scores big in dynamic liveliness and low-end oomph—necessities for a speaker that straddles the fence between stereo and home theater. Blessed with a seductive
overall warmth and sweetness, the Concerto Domus is one of the easiest-listening speakers around.

**Reviewed by NG, Issue 161**

**Canton Vento 807DC**
$3500
[cantonusa.com](http://cantonusa.com)
Our reviewer initially feared the Canton Vento 807 DC might be “another forward-sounding, metal-dome-based German speaker system with highs that can take your ears off.” But in time the 807 DC won him over in a big way with its combination of sonic purity and speed, transparency, pinpoint imaging, extended highs, coherence, and neutrality. This speaker will appeal to listeners who prize sonic accuracy above sweetness.

**Reviewed by JH, Issue 156**

**DALI Mentor 6**
$3500
dali-usa.com
The Mentor 6 is one of those few loudspeakers that are highly resolving and detailed without being analytical. Its treble is exceptionally clean and fast, thanks in part to the ribbon tweeter. Surprisingly, the bottom end is just as quick, infusing the music with a dynamic coherence that's rare at any price. The overall result is a presentation with very low coloration, both tonally and dynamically.

**Reviewed by SR, Issue 166**

**Vienna Acoustics Beethoven Baby Grand**
$3500
[sumikoaudio.net](http://sumikoaudio.net)
These handsome 3-way speakers have mesmerizing clarity across the frequency range; sweet highs; and a midrange that untangles the soundfield, even on orchestral tuttis, without becoming clinical. The bass is rich and clear down to about 50Hz. The Baby Grands play well with others and appreciate a subwoofer. The best-sounding speaker at its price that this reviewer has heard.

**Reviewed by RH, Issue 174**

**Vandersteen 3A Signature**
$3549
[vandersteen.com](http://vandersteen.com)
Like all Vandersteens, the 3A Signature is time-and-phase accurate. Its driver complement features the patented midrange and tweeter used in the vaunted Vandersteen 5. The 3A Signature has a relaxed presentation, is musically seductive, and will appeal to those who want to forget about the sound and enjoy the music, though it does trade off some dynamic contrast and midrange resolution for its overall ability to involve the listener.

**Reviewed by RH, Issue 122**

**MartinLogan Vista**
$3695
[martinlogan.com](http://martinlogan.com)
Those of you in search of the closest approach to midrange realism would be hard-pressed to do any better than the Vista—the smallest and most affordable member of MartinLogan’s revamped hybrid-electrostatic line. The mids flow naturally with commendable clarity. Imaging cohesiveness is superb. Tonal balance is on the lean side of reality, which suggests placement near room corners.

**Reviewed by DO, Issue 168**

**Von Schweikert Audio VR-4 jr**
$3995
[vonschweikert.com](http://vonschweikert.com)
The VR-4 jr has a number of endearing sonic attributes, the most notable being its bass performance, which is tight, well defined, and gutsy. In addition, the midrange is open, the soundstage superbly three-dimensional. The rear-firing ambience mid/tweeter adds considerable spatial depth, presenting the illusion of “round” images expanding in all directions.

**Reviewed by SK, Issue 151**

**Coincident Partial Eclipse II**
$3999
[coincidentspeaker.com](http://coincidentspeaker.com)
A three-way floorstander, the Partial shares many of the same sonic virtues that earned its big brother, the Total Eclipse, a 2001 Golden Ear Award. The midband is slightly warm, with highs that are gloriously open, tight, and extended, and bass that is well controlled. Mirror-image side-firing 8” woofers can be positioned facing in or out, necessitating some experimentation for proper room setup.

**Reviewed by SK, Issue 146**

**Acoustic Zen Technologies Adagio**
$4300
[acousticzen.com](http://acousticzen.com)
The Adagio’s strength is a rare degree of clarity that spans its entire range. Elements of its design—transmission-line mid/bass enclosures, modified circular ribbon drivers—contribute not only to the speaker’s overall lucidity, but to its seamlessness, tonal accuracy, sparkle and sweet detail in the highs, richness and nuance in the mids, and depth and detail in the bass. The soundstage is satisfyingly wide, deep, and high.

**Reviewed by RH, Issue 162**

**Magnepan MG 3.6**
$4450
[magnepan.com](http://magnepan.com)
Yet another great deal from Magnepan, this large ribbon/quasi-ribbon dipole gives you much of the sound of its big brother, the 20.1, for considerably less moolah. As with the 20.1, be sure to bring a high-power, high-quality amp to the party, and make sure you have sufficient space to let these things “breathe” or the ribbon tweeter will start to glare.

**Reviewed by JV, Issue 121**

**Hyperion HPS-938**
$4500
[hyperionsound.com](http://hyperionsound.com)
A small, three-way, bass-reflex model, the Hyperion has separate tweeter/midrange and woofer cabinets that house exceptional pro-
Quad 988/989
$5499/$8650
taigalic.com
The 988, latest incarnation of Peter Walker’s classic electrostatic, is, from around 40Hz out, neutral, coherent, linear, and transparent, with lower coloration and distortion than its predecessor. It will not generate the deepest bass, but in normal-sized or smaller rooms it will play at natural levels with a purity and accuracy that spoil you for other designs. The larger 989 retains most of the same virtues but will play louder and go deeper in the bass. The principal sacrifice is a certain projection in the upper midrange and lower highs that undermines the peerless neutrality of the original.
Reviewed by PS, Issues 130 and 126

NuForce S9
$5500
nuforce.com
A visually attractive, mid-sized speaker with unusual characteristics. The 89% MTM configuration and wave-guide tweeter control radiation both horizontally and vertically. The in-room response obtained in this way is very smooth, except for a prominence around 2kHz. Distortion is very low and the controlled radiation produces “X-marks-the-spot” stereo focus. If you’ve heard a lot of live music recently, you will be impressed indeed, says REG.
Reviewed by REG, Issue 169

Sonus Faber Cremona Auditor
$5650 (includes dedicated stand)
sumikoaudio.net
A stand-mounted two-way version of Sonus faber’s floorstanding Cremona, the Auditor shares many of that model’s virtues—warmth, coherence, sweet extended treble, and a seductive midrange—without the Cremona’s dynamic range and bass extension. The Auditor likes to be well into a room and its tilt and toe-in are critical.
Reviewed by Wayne Garcia, Issue 146

Paradigm Reference Signature S8
$5700–$6500 (depending on finish)
paradigm.com
The tall, beautifully-made S8 floorstander is a three-way, six-driver design whose hallmarks are high resolution, superb midrange openness, and first-rate bass that extends down to the upper-20Hz range with exquisite pitch-definition, even at high volume levels. Highs are clean, though faint traces of steeliness occasionally rear their heads. Imaging and soundstaging are good, not great.
Reviewed by CM, Issue 166

ATC SCM 20-2
$5800
atc.gb.net
ATC’s latest 20 Series model has been improved in virtually every way, and is less obviously a compact speaker than ever before. Thanks to the robust composite construction and non-parallel sidewalls, midbass coloration has been all but vanquished. The soft-dome tweeter raises the performance bar for transparency and resolving power, especially at lower levels. With only 83dB sensitivity, don’t scrimp on power—or robust stands to support 50+ pounds.
Reviewed by NG, Issue 154

Pioneer S2-EX
$6000
pioneerelectronics.com
Making TAD technology more affordable, Pioneer’s EX is a three-way stand-mount that will put many floorstanders to shame, with pinpoint imaging and powerful dynamics. Its coincident midrange/Beryllium tweeter is stunningly fast and accurate. Maybe a bit clinical up top, but remarkably uncolored overall. You’ll never feel the same way about a stand-mounted speaker.
Reviewed by NG, Issue 169

Revel Performa F52
$6998
revelspeakers.com
A near paradigm of tonal neutrality with muscular dynamics, unflappable composure at insane levels, and superior construction quality and finish. Capable of playing all musical genres with class and confidence. Some may quibble about a minor forward tilt, or a treble that could use a bit more bloom, or a shallow soundstage. Still, this is one of the great values to come down the high-end pike.
Reviewed by NG, Issue 169

Mirage OMD-28
$7500
miragespeakers.com
The three-way, four-driver OMD-28 is a full-range omnidirectional floorstander that offers good resolution and more precise imaging than many omnis do, while conjuring huge, spectacularly three-dimensional soundstages. Tonal balance is generally neutral, but the speaker’s slightly warmer-than-neutral midbass makes it best suited for use in medium-to-large rooms.
Reviewed by CM, Issue 170

Gradient Revolution Active
$7995
mayaudio.com
With its unusual dipole bass and forward-firing midrange and tweeter configuration, Gradient’s latest Revolution—with built-in amplification (a passive version is also available)—reproduces the original acoustics of the recording venue remarkably well. It sounds not like a box or a panel or anything else except a perfect point source.
Reviewed by REG, Issue 154

B&W 803D
$8000
bwspeakers.com
While the midrange of the 803D retains B&W’s hallmark clarity and transient speed, the new diamond tweeter is far smoother and less sibilant, yet also airier and more detailed than previous designs. And while the bass of earlier Nautilus speakers was generally on the dry side, and always “enough” but not copious, the bass of the 803D is considerably faster and more...
accurate, and the degree and extension is now “enough plus some.”

**Reviewed by Manoj Motwani, Issue 156**

**Verity Audio Rienzi**

$8000
verityaudio.com

A compact, two-piece, three-way, floorstanding design, Verity’s Rienzi is a model of neutrality, resolution, and transparency at its price-point. A refined speaker that can also rock, the Rienzi’s unusual bass enclosure arrangement allows owners to choose either a front- or rear-firing woofer arrangement, which adds flexibility with room placement.

**Reviewed by WG in this issue**

**Usher 8571 MkII Dancer**

$8840
usheraudio.com

An overachieving floorstander poised to eat any number of high-end cows for lunch, the Dancer produces a big, finely focused, high-resolution sound that is dynamically alive. Bass power, extension, and clarity are very good, too. The overall sonics are reminiscent of Wilson’s Sophia or WATT/Puppy speakers, but at a fraction of the price.

**Reviewed by CM, Issue 154**

**Quad ESL-2805**

$8999
taigallc.com

The addition of mass and bracing to Peter Walker’s revolutionary ESL-63 design and improvements in the manufacture of the panels yields bass that is more powerful and extended (but not subterranean), image focus that is even more stable, and dynamic range that is enhanced. Mated to the right amplifier, this speaker is capable of reproducing music with a sonic realism and naturalness that are compelling and addictive.

**Reviewed by JH/PS, Issue 169**

**Sonus Faber Cremona**

$9800
sumikoaudio.net

This gorgeous looking and sounding Italian floorstander is warm, airy, and seductive. It excels at resolving low-level information, is dynamically quite nimble as well as forceful, and presents a holographic soundstage. And though the Cremona is a “musical” as opposed to entirely “neutral” design, it is very revealing of source material and components.

**Reviewed by WG, Issue 143**

**$10,000 - $20,000**

**Wilson Audio Duette**

$10,950
wilsonaudio.com

The smallest speaker yet from Dave Wilson, this compact two-way of bookshelf dimensions is designed so that it will actually work on bookshelves and cabinets in settings where floorstanders can’t or won’t, and to provide the signature Wilson sound—highest resolution, lowest distortion, widest dynamic range, most nuanced dynamic contrast. PS finds the Duette an impressive achievement for its intended use and otherwise pretty wonderful, too.

**PS, reviewed in next issue**

**Martin Logan Summit**

$10,995
martinlogan.com

This elegant hybrid cone-electrostatic stands five-feet tall and sports two 10” woofers. Its sound is almost scarily three-dimensional, with a lively, life-like top end, a fast, tight, articulate low end, and the kind of midrange that has been getting people hooked on electrostats for the past 50 years. Its one drawback is limited vertical dispersion. Otherwise, the MartinLogan Summit is a fantastically beautiful and seductive product.

**Reviewed by BW, Issue 160**

**MBL 121 loudspeaker**

$12,300
mbl.com

A stand-mounted omnidirectional three-way that brings legendary MBL performance to smaller listening rooms. Stunningly dynamic and extended in its bass response for its compact size. Enveloping, immersive, and passionately romantic with symphonic works, it can also sound a bit amorphous on studio-made discs. Setup requires attentiveness—to balance the direct sound with the reflected sound. Needs power and the finest ancillary components to truly bloom.

**NG, reviewed in next issue**

**Rockport Technologies Mira**

$13,500
rockporttechnologies.com

The Mira is seductively warm and rich, yet gives up little in terms of detail and openness. Perhaps its most notable strength, because it usually comes with only the most costly designs, is a dynamic energy in the upper bass and lower treble regions that brings tricky instruments such as drums, bass, brass, and strings to vivid life.

**Reviewed by WG, Issue 149**

**Wilson Sophia 2**

$13,990
wilsonaudio.com

The Sophia 2 builds on the original’s strengths—extraordinary transient fidelity, deep bass extension, a huge spatial presentation, and a cabinet that contributes little sound of its own—with a smoother midrange and treble and even greater resolution.

**RH (review forthcoming)**

**Jamo R 909**

$14,000
jamo.com

This remarkable speaker, which uses dynamic drivers in an open baffle, offers the openness and resistance to room problems of a dipole planar combined with a power, solidity, and bass extension that few planars can even dream of. Coherent, dynamic, extended in the bass (to 27 Hz), very low in distortion, and tonally well balanced, the R 909 does a positively spectacular job of reproducing the scope and power of large-scale music.

**Reviewed by REG, Issue 167**

**Sound Lab M-1a**

$16,800
soundlab-speakers.com

A huge and hugely wonderful electrostat, the M-1 has the biggest soundfield, far and away the deepest bass (true 20Hz extension), and most lifelike dynamic range of any 'stat—in addition to the traditional virtues of 'stats (gorgeous tone color, lightning transient response, single-driver coherence, and phenomenal inner detail). Can sound a bit overblown in the bottom octaves if placement and amplification aren’t carefully minded.

**Reviewed by JV, Issue 122**

**Vandersteen Model 5A**

$16,900
vandersteen.com

The 5A is an ultra-high-resolution speaker that’s coherent and musically engaging from top to bottom, with the kind of convincing depth
of imaging that only time-and-phase correct designs can provide. It may not play as loudly as some designs, but offers superior performance in other respects. A relative bargain among statement loudspeakers.

Reviewed by SB, Issue 139

Eben X-3
$19,100
eben.dk

Five remarkable, mid-sized, extremely fast cone drivers are skillfully mated with an exotic planar-magnetic tweeter to produce a thrilling loudspeaker of reference caliber. While it misses the deepest synth and organ tones, the Eben is blazingly quick and dynamically explosive, with the rare ability to reproduce hard transients with stunning realism, without acoustic breakup or overhang.

Reviewed by JH, Issue 160

Verity Audio Parsifal Ovation
$19,495
verityaudio.com

They take a long time to set up properly and an extremely long time to break in, but these speakers disappear to a degree that Fred Kaplan thought only mini-monitors could. Fundamentals and overtones are pure, uncolored, and detailed; the crossover is seamless; and dynamics are captured with effortless agility. Until the speaker fully breaks in there is some discontinuity between the bass and the midrange/treble.

Reviewed by FK, Issue 160

Kharma Ceramique
Reference Monitor 3.2
$21,000

This diminutive two-way floorstander generates a huge, utterly transparent soundstage and a simply ethereal blend of tonal beauty, inner detail, and dynamic nuance. Surprisingly robust in the bass (down to a rock-solid 40Hz), the RM3.2 is a great choice for the audiophile looking for big-speaker sound in a small package.

Reviewed by JV, Issue 140

Focus Audio Master 3
$22,360

focusaudio.ca

This is one gorgeous-to-the-extreme loudspeaker with a beautifully fleshed-out, lush, and life-sized midrange. Image lines are perhaps a bit diffuse versus the pinpoint accuracy of a speaker like the B&W 800D, giving the Master 3 a warmer, more forgiving sound. Dynamics and detail are also excellent, with close-to-full-range bass response reaching down to 25Hz.

Reviewed by SK, Issue 166

MAGICO Mini II
$26,400 with stands

This new references, the beautifully made Minis from perfectionist speaker-builder Alon Wolf are triumphant examples of two applied arts—industrial and acoustical design. No longer limited in the bass thanks to Wolf's new drivers are skillfully mated with an exotic planar-magnetic tweeter and a beautifully fleshed-out, lush, and life-sized midrange. Image lines are perhaps a bit diffuse versus the pinpoint accuracy of a speaker like the B&W 800D, giving the Master 3 a warmer, more forgiving sound. Dynamics and detail are also excellent, with close-to-full-range bass response reaching down to 25Hz.

Krell Master Reference
$40,000
krell.com
Let’s face it—you’d have to be nuts to spend $40,000 on a subwoofer. (And, BTW, you only get one of these monsters for your 40Gs.) But, assuming you are nuts, and assuming you’re not fazed by the sheer girth of this 2600W, twin-15”, servo-woofered, 450-pound chunk of near-solid aluminum, then you’re gonna have a hard time finding more powerful, more coherent bass for music recordings and home-theater soundtracks. A sui generis masterpiece that, because of its outrageous cost and size, is likely to be heard only by a lucky few—and owned by an even luckier fewer.
JV

Parasound Halo A21
$2000
parasound.com
An excellent Class AB stereo transistor amp, designed by the redoubtable John Curl, capable of 250Wpc into 8 ohms (400 into 4 ohms). Though not the last word in solid-state amplification, the A21 comes close enough to the best, at such an affordable price, that JV could live with it contentedly in his very expensive reference system.
Reviewed by JV, Issue 168

Rogue Audio Stereo 90
$2195
rogueaudio.com
This tube monoblock combines a rich tube treble and midrange with a gutsy, controlled bass and a brilliant clarity unusual in its class. Its soundstaging is particularly fine. Its one shortcoming is a tendency to push the midrange a bit too hard.
forward unless the room is well-damped. Even with this, it makes all music sound right.

**Reviewed by SR, Issue 171**

### Channel Islands Audio D-200 monoblocks

**$2299**

[ciaudio.com](http://ciaudio.com)

Channel Islands Audio’s Class D monoblock amplifiers put out a healthy 200Wpc and are completely free of the reliability issues that sometimes plague other Class D designs. Sonically, they offer warm, well-defined midbass, articulate midrange and highs, and overall smoothness. Though some competing designs may have more openness and transparency, the D-200’s delicate balance of detail and ease will attract those who like their music with no rough edges.

**Reviewed by CM, Issue 161**

### Linn Majik 2100

**$2350**

[linn.co.uk](http://linn.co.uk)

The Majik 2100 is a 50Wpc solid-state amplifier that is all about transparency, textural detail, transient speed, and lively and energetic micro-to-mid-level dynamics. In short, it’s a great musical communicator. Since the amp does not offer huge reserves of dynamic headroom, we suggest pairing it with high-sensitivity loudspeakers.

**Reviewed by CM, Issue 173**

### PrimaLuna ProLogue Six monoblocks

**$2599**

[primaluna-usa.com](http://primaluna-usa.com)

These beautifully built, affordable, and “hassle-free” 70Wpc monoblocks will alter your preconceptions about tube gear. Indeed, their transient quickness and ability to drive difficult loads may fool you into thinking you’re listening to a very good hybrid. Yet with four very musical EL34s per chassis, they still have that wonderful tube magic.

**Reviewed by JH, Issue 169**

### Audio Research VS55

**$2995**

[audioresearch.com](http://audioresearch.com)

ARC’s formula is simple: Put the latest circuit refinements in a nice-but-not-lavish chassis, keep the power output moderate, and price within reach of most music lovers. The result: the stunning VS55, which delivers ARC’s classic sound at an affordable price. Used with the appropriate speakers and at sensible volumes, it is pure magic.

**Reviewed by RH, Issue 141**

### Conrad-Johnson MV60SE

**$3800**

[conradjohnson.com](http://conradjohnson.com)

Using four 6550C output tubes, this 60Wpc C-J lacks the last iota of resolution and can get a bit gritty in the treble as it reaches its power limits, but it has good transparency and soundstaging, finely shaded dynamics, thrilling low-level detail, and a well-defined top end. Above all, it is immediate and involving.

**Reviewed by DD, Issue 145**

### Audio Research 300.2

**$3995**

[audioresearch.com](http://audioresearch.com)

ARC calls this a Class T design (because it uses the Tri-Path module), but in a broad sense it is a switching amplifier with similarities to Class D designs. It has a dynamic liveliness that causes drums and plucked instruments like guitars to really stand out, and bass is very well defined. Detail is quite good, and the overall sound is a bit forward at first—something that goes away after a few days of constant play. Imaging is somewhat diffuse, but with 300Wpc, its performance is high and its price comparatively inexpensive.

**Reviewed by Tom Martin, Issue 164**

### Meridian G57

**$3995**

[meridian-usa.com](http://meridian-usa.com)

Rated at 200Wpc into eight ohms, the G57 is capable of delivering a full kilowatt, when bridged, into four ohms. As with other G Series components, the sound is expansive, soothing, and relaxing, yet with plenty of moxie when needed. The soundstage is impressively broad, tall, and deep. And almost as gorgeous as the sound is the sleek new full-width look.

**Reviewed by SK, Issue 152**
**McIntosh MC402**

**$9500**

[www.mcintoshlabs.com](http://www.mcintoshlabs.com)

Co-winner (with another Mac, the all-tube MC2102), of TAS’ Amplifier of the Year in 2004, this solid-state giant boasts a tube-like solidity and continuousness allied to absolute tonal neutrality (combining warmth and detail), with seemingly unlimited reserves of power and with noise and distortion figures that rival any competitor. By any measure, a great amplifier and PS’s reference.

Reviewed by PS, Issue 147

---

**MBL 8011**

**$6200**

[mbi-hifi.com](http://mbi-hifi.com)

The 8011 delivers a smooth, clear, grain-free sound that if anything is slightly soft, tonally speaking. With 1100 watts of peak pulse power, the MBL never shows signs of strain, while its low noise and excellent resolution allow recordings to sound as musical as they can.

Reviewed by PS, Issue 145

---

**Spectron Musician II**

**$6495**

[spectronav.com](http://spectronav.com)

The Spectron is Class D amplification that comes as close to fulfilling the promise of this new technology as anything currently in the field. At 500Wpc, it’s got the power of a Kenworth, yet it runs cool in an average-sized chassis. Its sound is on the warm side of neutral and low in noise, with superior control of micro- and macro-dynamics and superior bass.

**Mark Levinson No. 436 monoblocks**

**$12,500**

[marklevinson.com](http://marklevinson.com)

Smooth, sophisticated and superbly musical, the Levinson 436 power amp is the definition of refinement. There’s no lack of detail or three-
This fully-loaded version of the VK-600 balanced.com $24,000

gives the VK-600SE monoblocks

Balanced Audio Technology VK-600SE monoblocks $24,000

The single-ended-triode ML2.1 sounds nothing like the typical SET. It does not trade off accuracy for euphony; it is not bandwidth-limited (its bass and treble are sensationaly extended); and it is surprisingly powerful sounding (though not particularly “bloomy”) within its 17-watt limits. Given a sufficiently sensitive speaker it will produce one of the most detailed, spacious, dynamic sounds on the market. Like all Lamm products, the ML2.1s are a bit dark in balance, very quiet, and very reliable.

JY

Audio Research Reference 210 monoblocks $19,900

Audio Research Corporation has been making Class AB, 6550-based, pentode-tube power amplifiers since the 70s. In better than thirty exceptional years, the company has not made better amps than its 22Wpc Reference 210 and 610T monoblocks, which are significantly faster, lower in noise, more extended in bandwidth, and higher in resolution and dynamic range than any previous ARC efforts, without any sacrifice of the bloom, air, size, and space that ARC pentode amps are famous for.

$20,000 & above

Pass Labs XA160.5 (upgraded from XA160) $20,000

Passlabs.com

“An amplifier with soul,” the XA160 is the most “tube-like” transistor amp AHC has heard. Its sound is warmer than most, and the music emerges from deep black silence. Moreover, its soundstage depth matches its width; dynamics are musically natural and slightly “soft”; and the amp has terrific timbral accuracy.

Reviewed by AHC, Issue 149

MBL 9008 monoblocks $41,000

MBL.com

These 440Wpc junior versions of the 9011 monoblocks (see below) sound very much like their bigger brothers, which is to say they have sensational (albeit not quite 9011-level) front-to-back transparency; low-level resolution; large and small-scale dynamics; low-end extension, detail, and authority; and treble speed, detail, and punch. They are also blessed with gorgeous tone color and a top-to-bottom liquidity that (along with a slight overall darkness) is an MBL signature.

JY

Krell Evolution One monoblocks $50,000

Krell.com

While the Evolution One is not a radical sonic breakthrough, the best aspects of the original Krell sound-character and “voicing” have been preserved, but the original virtues of deep-bass power and rich natural timbre have been steadily enhanced, while air, life, microdynamics, soundstage depth and detail, and the upper octaves have improved to contenders for the state-of-the-art. A true sonic benchmark you really need to listen to.

Reviewed by AHC, Issue 158

MBL 9011 monoblocks $76,000

MBL.com

Driven by the MBL 6010 D preamp, the massive, super-powerful, ultra-expensive MBL 9011 monoblocks are superior by a wide margin to any other solid-state amps JY has auditioned. The first transistor amps JY has heard that fully combine the signal virtues of solid-state amps (extension, resolution, speed, sock) with those of tube amps (liquidity, rich timbres, and very low-level harmonic and dynamic detail), giving you nearly the whole note of any instrument, from starting transient to (and this is a first with solid-state) lingering decay.

Pathos Classic One MK III
$2750
musicalsurroundings.com
This is not only a fine amplifier; it is beautiful in every sense of the word. But if sheer dynamic scale and loudness are priorities, this 70Wpc tube model may not be for you. Instead, this is an amplifier that always gets the tone, timbre, and balance of music right, but only if played at natural levels and over reasonably sensitive speakers.
Reviewed by PS, Issue 160

NAD Masters Series M3
$2799
nadelectronics.com
Bristling with oomph, this pure dual-mono design boasts build-quality that shames some tonier brands. With 180Wpc on reserve, it conveys an easy-going neutrality and cushiony refinement. Bass is as controlled and extended as any integrated NG has encountered. The M3 may not have quite the air and bloom in the treble of the premium-spread silveramps, but it comes scary close.
Reviewed by NG, Issue 163

Ayre AX-7e
$2950
ayre.com
The AX-7 has all the hallmarks of the Ayre sound, but scaled down in output power. This beautifully made integrated has dimensionality, openness, image specificity, and transparency that rival much more expensive separates. Don’t be put off by the modest 60Wpc output rating, the AX-7 sounds robust and has bass extension that belies its modest specification.
Reviewed by SK and RH, Issue 171

Audio Research VSi55
$3495
audioresearch.com
The VSi55 serves up a rich midrange, combined with smooth—but never dull—treble, and with speakers with smooth low-frequency impedance curves, its bass can be powerful and well-controlled. This amp also handles dynamics with greater authority than its power rating would suggest, while conveying a sense of the musical whole. Be aware that the VSi55 trades away some transparency to give you the natural, relaxed, “holistic” sound of tubes.
Reviewed by TM, AVgM, Issue 1

VTL IT-85
$3750
vtl.com
The VTL IT-85 bathes music in a warm, golden glow that is hard to resist. While it is not the most powerful integrated amplifier—careful matching to loadspeakers (preferably mini-monitors) is a must—the IT-85 provides a large soundstage and effortless mids and highs. No other integrated in its price range comes even close to offering as musical and pure a sound.
Reviewed by JHeilbrunn, Issue 168

Plinius 9200
$4395
plinius.com
The 9200 is a thorough and timely re-imagining of the brilliant but aging 8150/8200. Still compact in size, it pumps out a healthy 200Wpc, and thanks to its strong Class A bias, the 9200 is sweeter and richer than ever. Even the all-new phonostage is quieter and more dynamic. Bass doesn’t sound as darkly ominous or extended as in years past, but control and definition are strikingly improved.

Balanced Audio Technology VK-300X
$4495–$6495 (depending on options)
balanced.com
Available in your choice of three different preamp stages—solid-state, tube, or 6H30 “SuperTube”—BAT’s VK-300X is a great integrated amplifier. Although refinements occur with each upgrade, its basic sound is airy, detailed, rich in timbre, and very immediate. And with 150Wpc output, it will not only drive pretty much any speaker, but it will do so with dynamic authority as well as agility.
Reviewed by WG, Issue 138

Edge G3
$6150
dgeamps.com
Although it lacks some of the technical refinements that make Edge’s separates special, it’s remarkable how close this integrated design comes to the sound of those designs. At 85Wpc, the G3 doesn’t have the tonal “darkness” and grain frequently heard from transistor gear. It’s quite neutral in balance, with a lack of electronic artifacts—brightness, edginess, hash—that makes it unusually easy to hear “into” the music.
Reviewed by WG, Issue 152

Chapter Précis
$6500
chapterelectronics.co.uk
Driven by Chapter’s unique Class D output stage (derived from Chapter’s Couple power amp), the Précis outputs 130Wpc, a figure that doubles into 4 ohms. Controlled by a single multi-function knob (from the Preface Plus preamp), the Précis is quiet, fast off the mark, and notable for its lack of coloration. Truly an integrated that is exploring the outer limits of what this technology can achieve.
Reviewed by NG, Issue 167

Conrad-Johnson CA200
$6500
conradjohnson.com
Essentially a power amplifier with a sophisticat-ed control volume control, the CA200 is stuffed to the gills with a circuit topology and a parts selection direct from connie’s flagship separates. The sound is powerful and dense in tone color, with effortless musicality across the bandwidth. Separates will buy you greater flexibility and a pinch more low-end slam, but there isn’t much out there to surpass the CA200’s finesse.
Reviewed by NG, Issue 173
**STEREO RECEIVERS & ALL-IN-ONE SYSTEMS**

**NAD C720BEE**
$599
nadelectronics.com

Heir to the classic 7020 receiver, the C720BEE represents NAD's no-frills, no-nonsense philosophy—in this case, 50Wpc of rich midrange and noise-free, glitch-free performance. A solid and sensitive tuner makes it appealing for radio junkies, too. Except for a lack of air in the treble and some lax pitch-resolution down below, this is one honey of a BEE.

Reviewed by RH, Issue 167

**Polk i-Sonic**
$599
polkaudio.com

This tabletop marvel plays CDs and DVDs, receives FM and XM satellite radio, and has inputs for external sources such as portable music players. But best of all, the i-Sonic sounds terrific, with an extremely neutral and uncolored tonal balance. The bass goes surprisingly deep, and the treble is highly refined and silky smooth.

Reviewed by RH, Issue 169

**Outlaw Audio RR2150**
$649
outlawaudio.com

Despite its retro looks, the Outlaw Audio RR2150 is a thoroughly modern design. It has a warm, musical sound, and allows easy connections to an iPod or other MP3 player via its 3.5mm front-panel AUX input, or streaming audio from a computer via a USB connector on the rear. It also sports a decent mm/mc phono-stage.

Reviewed by AT, Issue 167

**Arcam Solo**
$1749
arcam.co.uk

More than a receiver, Arcam’s versatile Solo combines a sophisticated 50Wpc integrated amplifier, a sweet-sounding AM/FM/DAB tuner, and a very good mid-level CD player in one slim package. It functions as a more-or-less state-of-the-art alarm clock, too. Though not the last word in transparency, detail, or performance at the frequency extremes, the Solo’s sound is nevertheless suave and expressive.

$2500 amp, $3500 CD player, $1500 tuner/phono preamp
resolutionaudio.com

Implausibly, the Opus 21 component stack combines all the advantages of an all-one box—intuitive operation, stylish aesthetics, reasonable cost—with those normally reserved for serious high-end systems: modularity, flexibility, and superior resolution, dynamics, and extension. This little stack’s practicality will thrill your Significant Other; its big sound will thrill you. And if you don’t need the full stack, consider the standout CD player, which constitutes its own bargain.

Reviewed by AT, Issue 167

**PS Audio Trio P-200**
$995
psaudio.com

The heart of the P-200’s circuitry is PS Audio’s “gain cell” technology, claimed to deliver excellent linearity because input signals aren’t attenuated or shunted to ground through a potentiometer. Robustly built and very easy to use, the Trio is an excellent minimalist line-stage preamp, one that’s ideal for pared-down music systems.

Reviewed by BW, Issue 170

**Rogue Audio Metis**
$995
rogueaudio.com

Rogue Audio’s award-winning Metis is a U.S.A.-made, vacuum-tube-powered (6SN7-based) preamplifier. The dynamic liveliness and harmonic richness we expect in any good tube designs are present at levels that remind us of the sound of $2500 tube preamps. But unlike tube designs that sound soft at the frequency extremes, the Metis remains evenly balanced and finely resolved from top to bottom.

Reviewed by CM, Issue 160

**Simaudio Moon i-7**
$6900
simaudio.com

This beautifully built, feature-laden integrated amplifier has an engaging musicality that many separates don’t approach. With no hint of glare or grain, the Moon i-7 reproduces instrumental tone color with seductive richness and realism. And with 150Wpc on tap, the i-7 has excellent bottom-end dynamics and the ability to drive a wide range of speakers. Supremely musical.

Reviewed by JH, Issue 164

**NAD C162**
$599
nadelectronics.com

Following other NAD products, the C 162 delivers plenty of resolution and three-dimensionality while drawing out the natural warmth and expressiveness of instruments and voices. To get the most from it, try matching it with the companion C 272 amplifier via a set of PNF Audio Icon interconnects and Symphony speaker cables. It also features an astonishingly good phonostage; some listeners may buy it for that feature alone.

Reviewed by CM, Issue 148

**Quad 99/QC-24**
$899/$899
tagillic.com

Along with a dandy mm and mc phonostage, the Quad 99 features a novel “tilt” control for tone correction. A solid middle-level performer, it lacks the ultimate transparency, liveliness, and dynamic openness of the very best units. The all-tube QC-24 line-stage is the least expensive to suggest that elusive quality of “continuance” in its presentation. The QC-24 has first-rate imaging in all dimensions, and a lively, engaging, remarkably neutral presentation.

**PREAMPLIFIERS**

**Vincent Audio SA-31**
$499
vincent-tac.de

The SA-31 is a well-made entry-level vacuum tube preamp that provides tone controls and a loudness contour switch. The preamp’s sound is characterized by a rich, seductive midrange and hearty and solidly weighted bass. Though not quite the equal of today’s best $1k preamps in terms of resolution, definition, or high-frequency “air,” the SA-31 offers terrific bang for buck.

Reviewed by CM, Issue 173
Van Alstine Transcendence 8
$1095–$1846
avahifi.com
Configured as a linestage (the optional phono-stage fared less well), the T8 is one of those rare products that genuinely transcends the constraints of budget amplification. Its sound is not particularly smooth or euphonic. But it won praise based on its stable imaging and killer dynamics. It benefits from being mated with a romantic tube amp.
Reviewed by DO, Issue 173

Arcam FMJ C31
$1599
arcam.co.uk
Smooth and grain-free with terrific detail, the laidback-sounding Arcam has the ability to play complex passages without apparent strain and without inducing listener fatigue. The soundstage is slightly recessed, particularly noticeable on large orchestral works, and it’s also full and deep. But no matter how smooth it sounds, the Arcam never sacrifices resolution. Nor does it have any trepidation about plunging down into the nether regions on organ music.
Reviewed by JHeilbrunn, Issue 169

PrimaLuna ProLogue 3
$1599
primaluna-usa.com
The vacuum-tube-powered ProLogue 3 preamp makes an ideal companion to PrimaLuna’s ProLogue 5 tube power amp. Like the power amp, the preamp combines traditional tube warmth and richness with a clear, crisp, precise presentation reminiscent of the best solid-state designs. Bass, too, is taut and clear.
Reviewed by SR, Issue 156

Cary Audio SLP-308
$1999
caryaudio.com
While not the highest-resolution model around, this linestage bares instruments in a pleasant and very musical golden glow. Excellent textures, too, which bring to all recordings that hard-to-determine sense of life or lifelikeness. Depth is quite good, but the third-dimension seems to end rather abruptly about two-thirds of the way into the orchestra. Likewise, stage width is slightly sheared off, as are dynamic extremes.
Reviewed by SK, Issue 152

Classé Delta CP-500
$3500
classiaudio.com
Electronics have no right looking this sharp and sexy, but Classé’s Delta Series proves it can be done. Sonics feature a chocolate-like midbass, a midrange with almost tube-like warmth, and an overall effortless and relaxed quality. Thanks to a low noise floor, delicate inner voices unfold with a full range of expression.
Reviewed by NG, Issue 154

Conrad-Johnson Premier 18LS
$4000
conradjohnson.com
C-J’s Premier 18LS is a remote-controlled solid-state linestage that handles microdynamic changes in musical energy with the lifelike realism and excitement of the best tube models. Also, like tubes, it never sacrifices soundstage depth for width, and honors the music in a natural way, without exaggerated detail.
Reviewed by AHC, Issue 151

Aesthetix Calypso
$4500
musicalsurroundings.com
The all-tube Calypso delivers most of the performance of Aesthetix’ two-box $13,000 Callisto linestage for about a third the price. What’s more, it benefits from Aesthetix’ second-generation styling, functionality, and industrial design. Sonically, the Calypso is characterized by extremely good dynamics and dynamic nuance. Although the treble is smooth and somewhat laid-back, transparency and resolution are first-rate. Noise floor is highly dependent on tube quality, which has been variable. Competes with the megabuck preamps.
Reviewed by RH, Issue 151

McIntosh C46/C2200
$4800/$5100
mcintoshlabs.com
Sonically and functionally a great preamplifier, the solid-state C46 features a truly useful set of controls, including an eight-band equalizer. It also has an excellent phonostage. In day-to-day use PS has never experienced a more pleasurable unit. McIntosh’s first new all-tube preamp in more than 40 years, the C2200 is a triumph that sports a gallery of features (including a good phonostage) and classic McIntosh sound. The midrange is the most neutral PS has heard in any tube unit, the bass response is equally fine, at once firm yet natural, and the highs are sweet, pure, and extended.
Reviewed by PS, Issue 147
**PREAMPLIFIERS**

**$5000 - $10,000**

**Edge G2**

$5195

dgeamps.com

Like its amps, Edge’s preamps are a different kind of solid-state—grain-free, open, neutral but not cold, and not at all dark or grainy. The sound described is with the G2 powered by its internal gel batteries. When the G2 is driven by AC, the sound is noticeably drier, harsher, and less magical. But given that the batteries only need charging once a week, this is not a practical concern.

Reviewed by WG, Issue 149

**Balanced Audio Technology VK-32SE**

$5495 (remote option adds $500, phono option adds $500)

balanced.com

Now equipped with BAT’s SUPER-PAK, a feature that doubles the power-supply capability over that of the earlier VK-30SE, the 32SE lends a slight emphasis to the upper midrange but is otherwise a highly musical and dynamically nimble performer. It has musical detail, with lots of air and harmonic color, good staging, and the ability to let the music breathe. Requires a long break-in period.

**VK-30SE reviewed by WG, Issue 156**

**Pass Labs X1**

$5900

passlabs.com

Remarkably similar in sound to the $10,000 XO2 (the main difference is in the power supply), Pass Labs’ X1 has the kind of natural air and harmonic sweetness we normally associate with tubes, as well as superb deep bass, overall neutrality, and good dynamic contrasts.

Reviewed by AHC, Issue 128

**Hovland HP-200**

$7500 (add $2000 for P-200 phono-stage)

hovlandcompany.com

An uncommonly beautiful piece of audio gear, Hovland’s HP-200 is an elegant, detailed, and natural-sounding preamplifier. Its detail doesn’t wow you in that “I never heard it like that before” sort of way, but rather reveals the inner workings of a performance. And it’s natural in that it allows instrumental and vocal timbres and textures to sound like themselves.

**$10,000 & above**

**MBL 5011**

$8720

mbl-germany.de

MBL, making some of the most gorgeous-sounding electronics out there, with a sound that comes remarkably close to marrying the best virtues of tube and solid-state designs. And though this line-stage model may not have quite the richness of tone color, energy, dynamic swing, detail, and mind-boggling transparency you’ll hear with its $19,680 big brother, the 6010 D, it comes mighty close.

Reviewed by WG, Issue 164

**Audio Research Reference 3**

$9995

audioresearch.com

The best preamp ARC has made in 30+ years of oftien-classic efforts. Like its companion pieces, the Reference 210 and 610T power amps, this is the first ARC tube preamp with the speed, resolution, bandwidth, and low noise floor of a great solid-state unit. One of JV’s two reference preamps.

Reviewed by JV, Issue 159

**Audio Space Reference 2**

$9999

audiospace.com

A genuine Audio Space oddity, the Reference 2 is a 300B-powered preamplifier. Despite its peculiar gain strategy (or perhaps because of it), it sounds more like the real thing in the midrange (when used strictly as a linestage) than any other preamp JV has auditioned, with nonpareil timbre, imaging, and bloom. Though it has its own built-in mm/mc phonostages, both were too noisy for JV’s taste. The Ref 2 is, however, a superb combination with ARC’s PH7 phonostage. JV’s other reference preamp.

Reviewed by JV, Issue 174

**Edge Signature 1.1**

$10,900

dgeamp.com

Unusual because it can be powered by either batteries or AC, the Signature 1.1—when powered by batteries, please note—has a glorious top end, a rich middle register, and wonderfully complex timbres, and delivers plenty of ambient information. What it lacks are body, low-frequency punch, and the last word in midrange dynamic wallop.

JV

**Simaudio Moon P 8**

$1,100

simaudio.com

If it weren’t for the absence of a mode (i.e., stereo/mono) switch, PS would find this two-channel, dual-chasis, dual-mono preamplifier literally perfect as regards function and user-friendliness. Like any superior modern solid-state unit, it’s tonally neutral and pretty much characterless. Additionally, its transparency is see-through, dynamic response hair-trigger and very wide, detail amazing, with that paradoxical combination of iron grip and utter ease. Drawbacks? Well, it does cost $11,000.

Reviewed by PS, Issue 165

**MBL 6010 D**

$19,680

mbl.com

The best solid-state preamp JV has auditioned. Its noise floor is so incredibly low that it consistently resolves fine timbral and dynamic details that simply aren’t audible on other great preamps. At the same time its transient speed and authority are beyond compare. To ice the cake, it has absolutely gorgeous tone color, the same liquidity and transparency that so distinguish MBL’s 9011 amps, excellent imaging and soundstaging, and superb ambience retrieval.

Reviewed by JV, Issue 164

**Mark Levinson No. 326S**

$10,000

marklevinson.com

The No. 326 possesses greater transparency and fidelity to the source than previous ML preamps, with less of the characteristic ML house sound. Astonishingly focused, and detailed, yet smooth, suave, and sophisticated. Superb features and ergonomics make the No. 326S a pleasure to use on a daily basis. RH’s reference preamp.

Reviewed by RH, Issue 161

**Krell Evolution Two**

$40,000

krell.com

The Krell Evolution series puts the third dimension back in music by providing exceptional depth. It also provides exceptional reproduction of hall sounds and musical mechanics—bowing sounds, score rustling, etc. This effect is enhanced by the imaging qualities of the Evolution Two. When the imaging on a recording is natural and detailed, the Evolution preserves the size, the place, the stability, and the layers of imaging. The result is a more open soundstage, better reproduction of life and air, and a greater ability to lose yourself in the music.

If you’re heavily invested in Red Book CD, you may not know how good it can get until you audition this price-but-worth-it transport and DAC from MBL. This combo is capable of eliciting magical levels of musical detail—much of it previously unheard—from silver disc, with unusually lifelike timbres and transient response, and unparalleled extension, definition, and slam in the bass.
JV

**Pro-Ject Debut III**
$299 (with arm and Ortofon OM5e) sumikoaudio.net

The Debut III offers music lovers a lot of analog virtues, like warmth and naturalness, at a bargain price. With the cartridge already installed, this turntable is very easy for even a novice to get going. One can easily improve clarity, bass articulation, and pitch stability by substituting a better Ortofon OM stylus, using isolation devices, or adding the Pro-Ject Speed Box MkII.
Reviewed by JH, Issue 172

**Rega P1**
$350 soundorg.com

Rega’s P1 is entirely British-made and uses the classic Rega motor, drive system, and main bearing. But instead of glass, the platter is made of MDF, and the arm is the new RB100, which comes pre-mounted with the Ortofon OM5e moving-magnet cartridge. You won’t get much frequency extension or wide dynamics here, but what you do get is the pace, musical interplay, and involvement that makes analog special.
Reviewed by WG, Issue 171

**Pro-Ject RM-5**
$699 (with arm), $899 (with arm and Sumiko Bluepoint No. 2 cartridge) sumikoaudio.net

The RM-5 is a scaled down version of Pro-Ject’s larger tables, and its sonic performance, aided by a carbon-fiber arm, tear-shaped plinth, and isolation feet, is a pleasant surprise. It’s a step up from entry-level tables and will appeal to audiophiles looking for more resolution, control, and realism, as well as a more flexible platform for tweaking.
Reviewed by JH, Issue 172

**Clearaudio Emotion/ Satisfy**
$1200 musicalsurroundings.com

The Emotion sports an acrylic plinth, high-quality bearing assembly, and matte acrylic platter, which is belt-driven by a decoupled synchronous motor. The Satisfy arm is a gimbaled-bearing design whose minimalist, one-bolt cartridge-carrier makes alignment a snap. It offers a dynamically lively and engaging presentation, conveys bass with power and speed, and works well with any number of cartridges.
Reviewed by CM, AVgM, Issue 9
Rega P5
$1345
soudorg.com
When paired with Rega's Exact phono cartridge, this table produced a highly musical sound that JH preferred to most digital players, regardless of price. The P5 is a low-vibration/low-coloration design that "is as close to a 'set it and forget it' analog front-end as you're likely to find," and "the absence of 'groove noise' is astonishing."
Reviewed by JH, AVgM, Issue 15

Pro-Ject RM 9.1
$1599 ($2099 as tested with Sumiko Blackbird cartridge, which is $799 when sold separately)
sunikomg.org
With the RM-9.1, Pro-Ject has made an already good design much better, and without raising the price. Like some of its competitors, notably the Rega P5 and VPI Scout, it includes an arm that is far superior to the stock arms you'll find on entry-level turntables, and the Sumiko Blackbird's performance comes close to that of some higher-priced lower-output moving coils.
Reviewed by JH, Issue 164

Kuzma Stabi S
$1800
themusic.com
The Stabi S is Kuzma's least expensive turntable, but you wouldn't know it to listen to the thing. Blessed with deep, warm background silences, the Stabi S makes a great complement to the Stogi S tonearm. Not a good choice for rooms where footfalls will be a problem (because it is unsuspended), it is otherwise a fine mid-priced 'table.
Reviewed by JH, Issue 164

VPI Aries Scout w/JMW-9
$1800
vpiindustries.com
If you want to experience a huge taste of analog heaven without the hellish price tag, the VPI Aries Scout deserves your attention. This simple, affordable 'table uses an inverted bearing with a Teflon thrust plate and a scaled-down version of the JMW unipivot arm to create an exceptionally quiet background and high signal-to-noise ratio, so music leaps out of silence into the room.
Reviewed by JHeilbrunn, Issue 172

Funk Firm Funk Vector
$2099
acousticsounds.com
From its amoeba-like plinth, to its one-motor, three-pulley drive, to its unusual platter, to its tweaked Rega arm, to its name, the Funk Vector brings an excellent level of sound to this range of analog playback. Though its presentation is a bit light when compared with upper-end high-mass designs, this table's sound is well balanced and nicely detailed.
Reviewed by WG, Issue 166

Basis 1400 Signature
$2200
basisaudio.com
Clean, lively, and nimble, the Basis 1400 lacks the great authority, deep black backgrounds, and projection of size and scale of the really great turntables. But this combination proves eminently satisfying and doesn't leave you hankering for something else.

Acoustic Zen Technologies Tsunami II and Gargantua II Power Cords
$350 and $1488
acousticzen.com

The Gargantua II is well named. At $1488, it is hardly an accessory, but it surprised SR by revealing in her reference system a new level of its native sweet clarity. SR uses the $350 Tsunami II with less-expensive gear. Both cords have the nice habit of clarifying delicate highs, deepening perceived bass, and opening up and airing out the soundstage. SR (review forthcoming)
**Furutech Reference III and Evolution Interconnect and Cables**

**Reference III Interconnect,** **$1200/1.2m (XLR), $1050 (RCA); Reference III Speaker,** **$1430/3m; Reference III Power,** **$1100; Evolution Interconnect,** **$560/1.2m (XLR), $490 (RCA); Evolution Speaker,** **$385/3m**

Furutech uses cryogenically treated, ultra-high-purity, OCC (Ohio Continuous Casting) single-crystal copper conductors in both its mid-priced Evolution and premium-priced Reference III audio cables. The top models offer better connectors, superior dielectric materials, and passive EMI-absorption filters made from GC-303 (and EMI-absorbent material developed by 3M Company). Furutech’s cables offer great transparency and purity, plus an uncanny ability to block out noise and grunge.

**Reviewed by CM, Issue 173**

**Harmonic Technology Magic Link One Interconnect:**

**$820/one-meter pair (RCA); $900/one-meter pair (XLR)**

harmonictech.com

With improved clarity and articulation over Harmonic Tech’s more affordable Pro Silway line, the Magic Link One consistently yields smooth, extended highs, a delightfully full and natural midrange, and solid bass. You may find other pricier interconnects that excel in one specific area or another, but when it comes to overall system synergy, this is one cable you’ll be “wearing” like a favorite pair of shoes.

**Reviewed by SK, Issue 108**

**Furutech Reference III+ Speaker Cable**

**$575/eight-foot pair**

furutech.com

Furutech’s Reference III+ Speaker Cable is sensual, romantic, and richly present with vocals, with full rich body and a slight forwardness. There’s a distinct sweetness in the upper octaves that, once experienced, makes it tough to live without. Soundstage reproduction is also a strong suit, as the full weight and breadth of an orchestra seem to laterally expand with this wire.

**Reviewed by NG, Issue 146**

**Kimber Kable Hero Interconnect/8TC Speaker Cable**

**$160/one-meter pair/$270/eight-foot pair**

kimberkable.com

Yielding only a tiny bit in sheer control, ultimate top-end transparency, and inner detailing to PS’s reference Kimber Select KS-1021, Hero’s bass lives up to its name, prodigious in amplitude and definition (rather better even than its pricier brother). This interconnect is either dead neutral or tilts a notch to the yang, with dynamics at once powerful yet finely resolved in an essentially grain-free presentation. Tilting a tad toward the yin, the 8TC has that elusive ability to remain musical no matter what is happening fore or aft, ideally mediating detail, liveliness, tonal neutrality, and dynamic contrasts within a very realistic, holographic soundstage.

**Reviewed by NG, Issue 146**

**Nordost Blue Heaven Interconnect and Speaker Cable**

**Interconnect:** **$190/one-meter pair; Speaker:** **$510/eight-foot pair**

nordost.com

Similar in personality, the Blue Heaven interconnects and cables excel at low-level detail, upper-octave smoothness, and transient speed. Also expect to hear exceptional inner detail and nuance emerge from the velvety black and silent background. Note that it may be a bit on the cool clinical side for some treble-happy systems, but remains ideal for neutral and darker ones.

**Reviewed by NG, Issue 138**

**MIT AVt Speaker Cable**

**$549/eight-foot pair**

mitcables.com

Perhaps canted ever so slightly toward the yang, the MIT AVt 1 counts power and definition among its many virtues. Perhaps there is ever so slightly less of a sense of bloom than with other cables, but the AVt 1 nevertheless suggests great openness, with a remarkable ability to project musical events into the room and an impression of snap and bite that in the best sense of those words is irresistible.

**Reviewed by PS, Issue 146**

**PNF Audio Icon Interconnect and Symphony Speaker Cable**

**Icon:** **$190/one-meter pair; Symphony:** **$400/ten-foot pair**

pnfaudio.com

PNF produces one of the finest sets of reasonably priced cables we have heard. We say “sets” here, because the Icon and Symphony offer complementary strengths and work best when used together, with a huge amount of resolution and focus, clear and deeply extended bass, dynamic expressiveness, and the ability to enhance both clarity and smoothness. They lean toward the “clarity” side, so avoid components with midrange brightness or edge.

**Reviewed by CM, AVgM, Issue 4**

**Nordost Baldur Interconnect and Speaker Cable**

**Interconnect:** **$499/one-meter; Speaker:** **$1380/three-meter pair**

nordost.com

Baldur brings much of the balance and harmonic integrity of top-of-the-line Valhalla to prices even “normal” audiophiles (as opposed to normal people) can afford. It has a buttery way with transients and isolates low-level details with the best of them. Although never edgy, there is a whitish zone in the lower treble. Perhaps not as weighty and focused as some, but with an overall balance and musicality that are addictive.

**Reviewed by NG, Issue 164**

** tts** here, because the Icon and Symphony offer complementary strengths and work best when used together, with a huge amount of resolution and focus, clear and deeply extended bass, dynamic expressiveness, and the ability to enhance both clarity and smoothness. They lean toward the “clarity” side, so avoid components with midrange brightness or edge.

**Reviewed by CM, AVgM, Issue 4**

Purist Audio Design Dominus Interconnect and Speaker Cable
Interconnect: $5250/one-meter pair; Speaker: $10,980/1.5-meter pair
puristaudiodesign.com

The all-silver Dominus is very detailed, very dynamic, very rich. Less open than Nordost Valhalla and darker in balance than Kharma Enigma, it is also quieter than both, and because of its fluid-damped construction, virtually immune to floorborne and airborne vibration. JV

Rega Couple Interconnect
$175/1-meter pair
soundorg.com

The Couples offer plenty of upper midrange/treble detail, with fine resolution of textures, yet without exaggerated transients or edginess. Their bass is tight and punchy, and they are wonderfully neutral throughout the midrange. While they don’t offer the almost “luminous” midrange quality you’ll hear in some very expensive cables, their essential neutrality makes a fine substitute for a “pennies-on-the-dollar” price.

Shunyata Python Power Cord
$995
shunyata.com

As RH put it in his review, “the idea that a power cord comes at the end of a very long power-transmission system is purely one of perspective. From the amplifier’s point of view the power cord is the first few feet of the power-delivery system.” With the Python, expect greatly improved transparency, soundstaging, tighter focus, and air, “fostering a greater impression of hearing an actual instrument in an acoustic space.”
Reviewed by RH, Issue 164

Siltech Paris MXT Interconnect/New York MXT Speaker Cable
$199/one-meter pair/ $491/2.5-meter pair
siltechcables.com

The only tonal anomaly of this superb interconnect is a slightly recessed midrange—very slight—that throws the tonal balance about three degrees to the yin, albeit in no way that's unmusical. Otherwise, it has a smooth, tube-like sound that’s not the least sibilant, while the low end is warm and solid. Like many components that have a slight midrange trough, the entire presentation is somewhat set back, with a rather conspicuous rendering of depth. Luxurious as an Italian loafer, the Siltech New York MXT is sensibly weighted toward the midrange and basically neutral in balance, with a slightly rounded treble. Virtually grain-free and one of the most harmonically palatable and realistic in its price range, it also offers excellent low-level resolution. Though soundstage dimensionality could be improved, no serious faults trip this up.
Reviewed by PS, Issue 138, and NG, Issue 146

Paul Speltz “Anti-Cable” Speaker Cable
$80 (8-foot pair w/spades)
anticables.com

A godsend to those who want good sound but don’t want to spend big bucks. SK was blown away by its neutrality and lack of coloration, high frequencies that are open and clear with no tizziness, a midrange of exceptional clarity, transparency and detail, and bass that’s extended, with remarkable articulation.
Reviewed by SK, Issue 162

Synergistic Research REL-spec Subwoofer Cable
$1100/3 meters
synergisticresearch.com

Pricey but potent, these inspired subwoofers are specifically optimized for REL subwoofers and include the REL-specified Neutrik connectors. They improved the inherent musicality and pitch precision of the Britannia B3 in every instance—the lowered noise floor yields more detail, an enhanced sense of space, and expanded ambience retrieval.

**Richard Gray Power Company 600S, 1200S, and Pole Pig**

$1395, $2195, and $1595  
richardgraypowercompany.com

The RGPC 600S, in combination with the RGPC Pole Pig, works invisibly, lowering noise and increasing detail without markedly inhibiting dynamics or adding a noticeable sonic signature. For those of you living in older houses, these Richard Gray products are like adding six-to-twelve dedicated, lab-grade outlets to the ones you've got, without tearing up any walls or calling the electrician. The 1200S is RGPC's biggest and most capable conditioner, offering two banks of six Hubbell outlets. Unlike many conditioners, RGPCs operate in parallel to your AC lines, so that system components do not, strictly speaking, have to be plugged into the RGPC in order to enjoy its sonic benefits. (However, we suggest plugging components through the RGPC in order to take advantage of its surge-suppression capabilities.) Significantly, the RGPC 1200S can often improve (and never limits) the sound quality of huge, blockbusting amplifiers.

**JV (1200S reviewed by CM, Issue 144)**

**Monster Cable HTS series power conditioners**

$100–$700  
monstercable.com

Although we haven't auditioned every conditioner in Monster Cable's huge line, those we've heard have been extremely effective at lowering noise, smoothing tonal balance, and improving resolution. A huge bang for the buck.

**RH**

**PS Audio Duet, Quintet, PowerPlant Premier**

$295, $495, $2195  
psaudio.com

The PS Audio Duet, Quintet, and Power Plant Premier provide superb surge-protection at a wide range of prices. The PowerPlant Premier, however, goes much further. You may not hear a striking consistent improvement using its output—which is capable of dealing with all but the largest possible Class A amps—but you'll never have a bad moment of low-level noise; sensitive equipment like a video projector is likely to live longer; and you'll know you're getting the best your equipment can deliver.

**Reviewed by AHC, Issue 174**

**Shunyata Hydra-8/Hydra-2 AC Power Conditioners**

$2495/$395  
shunyata.com

When used as a complete system with the Hydra-8 on the front-end components and Hydra-2 on the power amps, along with Shunyata's AC cords, the improvement in sound quality is nothing short of spectacular. The improvement in low-level resolution alone is worth the price of admission. But the Shunyata system also renders a huge increase in soundstage focus, size, and depth, and midrange and treble liquidity. The best AC-conditioning system RH has heard.

**Reviewed by RH, Issue 163**

**Walker Audio Valid Points and Velocitor Power Line Enhancers**

**Valid Point Supertuning kit, $525; Velocitor with Valid Points, power cord, and dedicated stand ($3445)**  
walkeraudio.com

Cryogenically treated, in case you want to bring it back to life in a decade or so, the Velocitor does undeniably lovely things for the sound of gear that is plugged into it or into the circuit it is plugged into. The Valid Points, Walker's massive tiptoes, are sensationally effective under most components, particularly when used with Walker Resonance Control discs, which themselves, can have a salubrious effect on top of gear.

**JV**

**ACCESSORIES**

**AcousTech Electronic Stylus Force Gauge**

$185

Getting the most out of any turntable rig requires an accurate vertical tracking force setting—and yes, kids, you can easily hear up and down changes as slight as a tenth of a gram. Not only is AcousTech's new gauge a relative bargain; it is small, has a backlit display, is incredibly easy to use, measures tracking forces from 0.001 to 5.000 grams at the height of an LP's surface, and is said to be accurate to within ±0.002 grams.

**WG**

**Acoustic Room Systems (now part of Cinema Tech)**

$20,000–$50,000  
acousticroomsystems.com

Money spent on real acoustic treatments is, in RH's experience, the most effective allocation of your hi-fi budget. RH has lived with different acoustic products, but none has been as effective or blended into the décor as well as the Acoustic Room Systems package. The ARS system greatly improves bass tautness and definition, allows the hi-fi system to better resolve spatial cues, and adds to the music's sense of palpability and realism.

**Reviewed by RH, Issue 139**

**ASC Tube Traps**

$498–$2638  
tubetrap.com

Unless you have a professionally designed and treated room, Tube Traps from Acoustic Sciences Corporation are absolutely indispensable to improving your system's sound. With strategic placement and orientation, they can be used to solve a wide range of acoustic problems. Boomy bass can be cured with a pair of 16" Full Rounds in the corners behind the loudspeakers. Placed along the sidewalls between you and the loudspeakers, Tube Traps kill unwanted sidewall reflections, prevent flutter echo, and aid in diffusion. A single Tube Trap in the center of the wall behind the loudspeakers can expand soundstage depth. There are lots of questionable acoustic products on the market, but Tube Traps are the real deal.

**RH**

**Audioquest Anti-Static Record Brush**

$20  
audioquest.com

What's the best way to keep clean records clean without attracting dust particles? One of our favorite methods is to use Audioquest's anti-static record brush, whose bristles are made up of “over a million polished carbon fibers.” A swing-down brush guard doubles as a bristle cleaner to prevent dirt build-up.

**CM**
ACCESSORIES

**Auralex Acoustics Studiofoam Wedges**

*Price varies*  
*auralex.com*

If you’ve logged much time in home recording studios, odds are that you’ve already seen and heard Auralex Studiofoam Wedges in action. Studiofoam is highly absorbptive, and therefore can be just the ticket for taming slap echoes or audible comb-filtering effects that can result when listeners are seated too close to the back walls of their listening spaces.

**CM**

**Bright Star Audio Iso-Rock Speaker S**

*$499*  
*brightstaraudio.com*

This dedicated stand for Gallo’s Nucleus Reference 3 increases both the height and scale of images, drastically improves soundstage width, depth, and realism, and brings a truer, more lifelike presentation to all recordings. If you own the Reference 3, the IsoRock is not a tricked-out accessory but an essential component.

**Reviewed by Bob Gendron, Issue 156**

**Clearaudio Spirit Level**

*$45*  
*musicalsurroundings.com*

Turntables sound their best when they are level—something careful listeners will want to check at set-up time and verify periodically. (Remember: Furniture and floors sometimes settle a bit over time.) Use a good multi-axis spirit level such as this one from Clearaudio to keep your ’table on the level.

**CM**

**Clearaudio Strobo-disc and Strobe Light**

*$60 and $150*  
*musicalsurroundings.com*

Featuring grooves that create the additional stylus drag necessary to accurately measure your turntable’s speed—while at the same time doubling as a cartridge break-in device—Clearaudio’s Strobo-disc and Strobe Light are great tools for the serious vinyl junkie.

**HP’s Workshop, Issue 159**

**Clearaudio Matrix Record Cleaner**

*$3200*  
*musicalsurroundings.com*

Clearaudio’s Matrix record cleaner is the Porsche of record-cleaning machines. Built to a higher standard than many turntables, the Matrix provides bi-directional platter rotation, powerful two-level vacuum, and an adjustable brush.

**Reviewed by JV, Issue 142**

**Clearaudio Double Matrix Record Cleaner**

*$4400*  
*musicalsurroundings.com*

The Double Matrix not only does everything that the Matrix does, it does it to both sides of your records simultaneously, effectively cutting in half the amount of time you spend cleaning your LPs, and it does it considerably more quietly than the Matrix, while also adding effective anti-static treatment to the formula. If you’re seriously into vinyl, the Double Matrix is unquestionably the record cleaner of choice.

**JV, review forthcoming**

**Echo Busters**

*$175 and up*  
*echobusters.com*

The cool thing about Echo Busters, as well as most other room treatment, is you don’t have to buy the whole shebang at once. SK recommends starting off with a couple of Bass Busters or maybe just a set of Corner Busters. The effect is dramatic and cumulative, and you can add on as your budget allows.

**Reviewed by SK, Issue 159**

**Express Machining Digital Stylus Force Gauge**

*$160*  
*musicdirect.com*

This excellent gauge is accurate to 1/10th gram, very easy to use and store, and an affordable alternative to the Winds ALM-1 (see below).

**WG**

**Feickert Universal Protractor**

*$250*  
*acousticsounds.com*

Feickert’s invaluable protractor includes a white disc with markings on each side—for Baerwald and Lofgren geometries—and 50 and 60Hz strobe patterns for setting speed. This is an impressively machined aluminum measuring-device that turns accurately measuring stylus-to-pivot distances from hair-pulling frustration to child’s play, and includes a step-by-step instruction booklet that makes fine tuning your cartridge’s geometry a remarkably easy procedure.

**Reviewed by WG, Issue 171**

**Furutech deMag**

*$1800*  
*furutech.com*

What’s that you say, demagnetize vinyl—a plastic? Yes, it seems that the pigment added to the plastic contains small amounts of ferrous material that magnetizes vinyl LPs. A quick 20-second zap to each side of an LP results in audible improvements to noise floor, dynamic range, and perceived resolution. The same goes for optical media, including DVDs, and evidently cables and power cords, too.

**WG**

**Gryphon Exorcist and Black Exorcist Demagnetizers**

*$230 each*  
*acousticsounds.com*

These nifty devices are designed to do the same thing (one system-wide, the other for phono cartridges): rid audio gear of magnetic build-up. The size of a remote control, the Exorcist hooks up to your preamp’s aux or line input, while you plug your arm leads into the Black Exorcist. Audible results include less glare and hash, tighter bass, and greater perceived detail and musical integration.

**WG**

**Lyra SPT Stylus Cleaner**

*$44*  
*immediasound.com*

Mission accomplished. The SPT puts the fluid where it belongs. Lyra’s formulation scrubs each precious stylus clean without leaving any residue and ultimately reducing the compliance of the cantilever. A tiny angled brush is included.

**NG**

**Nordost Eco 3 Spray**

*$44 (eight-ounce bottle)*  
*nordost.com*

Designed to eliminate the build-up of static charges on cables and interconnects, this stuff works equally well on equipment racks, CDs, DVDs, and turntable platters. Use when installing new cables or re-squirt every few weeks. The sound is noticeably smoother, and also more present and alive.

**WG**
**Shure SFG-2 Stylus Force Gauge**

$20

[shure.com](http://shure.com)

Although ultimately not as accurate as the best digital gauges, the classic “teeter-totter” Shure is simple to use and cheap, and does the trick very nicely.

**WG**

**Townshend Seismic Sinks**

$400-$9000 (depending on weight capacity)

townshendaudio.com

Townshend Seismic Sinks are air-bladder-suspended isolation platforms, available in several sizes and weights to accommodate a wide variety of components. Setup is straightforward and easy. Because the Sinks act as filters (around 2–4Hz), they isolate far better than cones, which anchor components solidly but in so doing allow vibrations to be transmitted directly to the chassis. The Sinks are exceptionally effective with non-suspended turntables.

**PS**

**Vibrapods**

$5.99 each

[vibrapod.com](http://vibrapod.com)

Vibrapods are small, flexible vinyl pucks that can transform a system. They’re numbered by their weight-bearing loads. Put them under speakers and electronics and hear more extended bass and smoother highs. At four for $24, who says great tweaks have to be expensive? Just out, Vibrapod Cones—use them as standalone footers or combine with Vibrapods.

**DD**

**Walker Audio Prelude Record Cleaning System**

$85

[walkeraudio.com](http://walkeraudio.com)

There are many excellent record-cleaning solutions out there, but this one, developed by analog guru Lloyd Walker, is superb. Designed to work in conjunction with any record-cleaning machine, Prelude really does reveal details that have gone unheard beneath layers of dust and wear.

**JV**

**Introductory Guide to High-Performance Audio Systems**

Robert Harley

Acapella Publishing, 240 pp., $19.95

Hifibooks.com

The Introductory Guide does for the novice what The Complete Guide does for the more experienced audiophile: provides an entirely lucid handbook of genuinely useful information...
about stereo/multichannel gear and setup. No one explains technical matters to the layman better than our Mr. Harley.

**Reviewed by JV, Issue 172**

**The JBL Story: 60 years of Audio Innovation**
**John Eargle**
JBL Pro Audio Publications, 320 pp., $29.95

The late, indisputably great John Eargle's last book: a love letter to the James B. Lansing company, for whom Mr. Eargle labored so long and well as a technical advisor. A book that will bring nostalgic tears to the eyes of those of you who remember hi-fi way back when.

**JV**

**McIntosh ...”for the love of music”**
**Ken Kessler**
McIntosh Laboratory Inc., 315 pp., $150

This profusely illustrated and carefully researched book on the celebrated audio company is lively and informative and just plain fun to read. It is primarily a social history, but the social history is irresistible, and the book gives a wonderful feel for the early decades of American high fidelity.

**REG**

---

**The Master Handbook of Acoustics, Fourth Edition**
**F. Alton Everest**
McGraw-Hill/TAB, 592 pp., $39.95

This classic book, updated over the years, is a crash course in how sound behaves in a room and how to treat rooms to improve sound quality. It’s not audiophile-oriented, but explains the basic physics that audiophiles need to know when choosing or treating listening rooms.

**RH**

**Mastering Audio: The Art and the Science**
**Bob Katz**
Focal Press, 319 pp., $39.95

Although written for professional mastering engineers, *Mastering Audio: The Art and the Science* contains a wealth of information of interest to the audiophile. If you want to know what goes on behind the scenes in recording the music you enjoy, and learn more about digital audio, this comprehensive, insightful, and accessible book is without peer.

**RH**

**Music, Sound, and Technology**
**John Eargle**
Springer, 368 pp., $114.95

Meant primarily for college students, Eargle’s book is what it claims to be—a classic guide to musical acoustics. If you’re looking for the best resource on hi-fi systems, buy Robert Harley’s *Complete Guide*. If you’re looking for a book on how various acoustic (and electric) instruments make the sounds they make and what those sounds comprise, harmonically, dynamically, and temporally, Eargle’s is the standard text.

**JV**

**Music, The Brain, and Ecstasy**
**Robert Jourdain**
Perennial, 400 pp., $13.95

Combining musicology, psychoacoustics, and neural science, Robert Jourdain weaves a fascinating exploration of why human brains find beauty and meaning in music. Why do our brains comprehend, for example, the large-scale structure of a symphony? The book is short on answers, but we are richer for having explored the questions.

**RH**

**The NPR Listener’s Encyclopedia of Classical Music**
**Ted Libbey**
Workman, 979 pp., $19.95

TAS contributor Ted Libbey has written a must-buy for the classical music lover—from the novice to the knowledgeable. Written in a friendly yet informed style, this book is not only chock-full of information, it also has a very cool interactive feature (via the Naxos Web site) that allows you to hear recorded examples while you’re reading.

**WG**

**Quad—The Closest Approach**
**Ken Kessler**
International Audio Group, 215 pp., $80

U.K. audio writer Ken Kessler has documented the history, products, and contributions to audio of one of the seminal high-end companies. The book contains interviews with Quad founder Peter Walker and his son Ross, reprints of old ads, Walker’s original papers on loudspeaker and amplifier design, and other bits of interest to Quad fans.

**RH**

**Sound Bites: 50 Years of Hi-Fi News**
**Ken Kessler and Steve Harris**
IPC Media, London, 224 pp., £14.95 (U.S. availability: MusicDirect or amazon.com)

While *Hi-Fi News* at fifty is the occasion for this book, it’s no self-congratulatory piece of puffery. After a long chapter on “pre history,” i.e., telescoping audio in the first half of the last century, it’s structured as a loose, anecdotal history of hi-fi, centering principally on the men who made the medium from the beginning of stereo to the present.

**Reviewed by PS, Issue 162**

**This is Your Brain on Music**
**Daniel Levitin**
Dutton, 314 pp., $24.95

Author Daniel Levitin left a successful career as a rock-music producer to study neuroscience—specifically to explore the questions of how we experience music and why music is so fundamental to daily life. In a lucid and engaging style, Levitin guides us through the elements of music and relates those elements to the underlying workings of the brain. A must-read for all music lovers.

**RH**
SPEAKER SYSTEMS

**Nola Grand Reference Mk IV.2**
- Price: $146,000
- [nolaspeakers.com](http://nolaspeakers.com)

Over a six-year period, designer Carl Marchisotto has taken this towering multidriver hybrid design from a romantic speaker of the “big sound!” school to, in its latest incarnation, a system capable, with carefully selected affiliated equipment, of a stunningly high level of realism. He has largely solved the discontinuity between its large woofer towers and main speakers, and has freed the top octaves to become capable of the airiness of the real thing. In retrospect, I'd call the References a work of art in progress.

**Magnepan 20.1**
- Price: $12,500
- [magnepan.com](http://magnepan.com)

With one quite significant reservation, this is the speaker system, if someone pushed me to one of those paint-yourself-in-a-corner judgments, I'd choose to live with. It is, top to bottom, as uncolored in the sense of getting music's tone colors right, as anything on the market, including the old Quad electrostats of yesteryore. Designer Jim Winey's true ribbon tweeter, updated in the point-one version, is as neutral as any high-frequency reproducer on the market; and the blending of the planar panels below is so good you might not hear the slight discrepancy unless you are an audio martinet. But the reservation is serious: The woofers panels flap significantly if you push the speaker to rock-music levels, which is why a subwoofer is required. And so far none of them I've heard makes a seamless mating. (I use a subwoofer.)

**Hansen Kings V. 2**
- Price: $74,000
- [Hansenaudio.com](http://Hansenaudio.com)

In an audio world overflowing with large multidriver, multiway speaker systems, the Hansen is, the way I hear it, close to unique in the seamlessness of the top-to-bottom sound and in the coherency of its character. Too many hot-sellers in today's market sound like boxes of drivers, each with its own sound and its own dispersion and resonance characteristics. The speaker goes astonishingly low—it can make dust fall from the ceiling and it can be played at levels you won't use if you want to keep your hearing. But they do this with exceedingly low distortion and without the world's biggest amps. Its enclosure design is such that it (seems to me) contributes little or no “box” sound of its own, as its competitors mostly do. Good enough to be a reference.

See HP's Workshop, Issue 168

**Reference 3a Grand Veena speakers**
- Price: $7000
- [reference3a.com](http://reference3a.com)

Review to come. But let this be said for the here and now: At about a tenth of the cost of its nearest sonic competitor, this speaker is a stunning achievement and perfect for the not-too-well-heeled music lover who doesn't live in a cathedral-sized space.

**TURNTABLES & INTEGRATED TURNTABLES**

**Blue Pearl JEM**
- Price: $90,000
- [acousticedreams.com](http://acousticedreams.com)

First off, my personal qualification here: I haven't had access to all the Big Spender turntable designs, so making a comparison and thus assessing the Pearl's relative worth and relative truth is something I wish I could do, but cannot. However, Pearl herself is, taken on her own terms, mighty impressive, if not entirely all she should be at the price. We've had some problems with her motor drive (not serious) and some acoustic breakthrough on her secondary mounting platform (the one with the platter, etc.), which we also managed to jiggle our way 'round. The sound is smooth beyond my experience with any 'table, and almost “sweet,” with extension down into the subs without the artificial transistor-like bass from older Clearaudio designs. Finely tuned, the Pearl is so subtle in dynamics that she widens the dynamic scaling of an LP.

**EAR Disc Master Magnetic Drive**
- Price: $17,500
- [ear-usa.com](http://ear-usa.com)

Much discussed in my original review. I've had some second thoughts here, none that undermine the audible superiority of its magnetic-drive design, but a few you ought to know about. The belt that drives the lower magnet assembly can become loose, which means warp-wow that will turn Lang Lang into Spike Jones. It can be tightened and there ought to be instructions on how to do this. It isn't the best built 'table I've seen (the VPI Scoutmaster scores it), and it doesn't have the bottom-end authority (despite the freedom from motor noise in LP playback) that it should. But if it's the future you want to hear, you may start here. Oh yes, also, to my dismay, it's harder to get than an authentic remnant of dinosaur DNA.

**VPI Super Scoutmaster Reference & JMW 10.5i arm**
- Price: $7400
- [vpi.com](http://vpi.com)

Harry Weisfeld's latest version of the Scoutmaster takes its performance and sound into an entirely new category. One marked by lower noise, lower coloration, faster dynamics, and a top-octave airiness I didn't associate with VPI designs. Review in the works.

**PICKUP ARMS & MOVING-COIL CARTRIDGES**

**Graham Phantom B-44 tonearm**
- Price: $4300
- [graham-engineering.com](http://graham-engineering.com)

Another work of art that has progressed from
performance I respected (because I thought I could see its future potential) but hardly loved, given a cool, whitish analytic quality. Boy, has that ever changed. Who knew a unipivot could sound this focused, this precise (without that quality being a distortion), and this free from resonances, euphonic or otherwise? Set it up right, and it can be said to be romantic; if you understand the nature of music, especially as captured on LP, it's romance itself. Further thoughts to come. Oh yes, the new titanium arm wand is the one to have.

**Tri-Planar Mk VI tonearm**
**$3900**
[triplanaran.com](http://www.triplanaran.com)

The Tri-Planar design, the creation of the late Herb Papier, has undergone an update to the Mark VII version. But the VI is well worth seeking out, especially if you're given to the unlikely but convincing combination of high accuracy and high romanticism.

*See HP's Workshop, Issue 165*

**Dynavector XV-1s cartridge**
**$4250**
[dynavector.com.jp](http://www.dynavector.com.jp)

A long-standing reference at HP's listening studio in Sea Cliff, one that now faces some sudden and stiff competition from two other designs. Updates and reviews in the works. Sometimes it's tough being at the top of the mountain.

*See HP's Workshop, Issue 165*

**47/Lab Miyabi Black Ebony cartridge**
**$3950**
[sakurasons.com](http://www.sakurasons.com)

Depending on which pickup arm you use, the Miyabi can, given its weight and higher than normal resonance point, either have an overly big but articulated bottom octave, or one in the right sonic proportions. Fine, say, in a VPI JMW design; euphonically delicious in the Tri-Planar. So, used with care, of reference quality.

*See HP's Workshop, Issue 165*

---

**PHONOSTAGES**

**ASR Basis Exclusive (battery operated)**
**$6950**
[halfnoteaudio.com](http://www.halfnoteaudio.com)

We have several other phonostages on hand that are impressive, especially the deluxe version from Aesthetix’s Jim White and the Groove Plus from Tom Evans, but in terms of a noise floor so low the sound seems to be riding on a velvet carpet, nothing can compare to this battery-operated (and transistorized) unit from Germany. When updated to its second version, the top octaves opened up and let the air flow in. Its character is on the yin side of the spectrum. And thanks to some changes in Europe’s Common Union regulations, this (and all other electronics using lead in their construction) will have to be updated. As in alchemical times, gold will replace the lead here.

*See HP's Workshop, Issue 165*

**ASR's totally battery-powered phonostage**, input stages, which, taken in tandem with the circuit, and, in the case of Barber’s design, make other tubed designs sound flat-chested—soundfield so dimensional it seems, for now, its outer limits, with eight 300B tubes per amp, and a rated power happily in excess of 100 watts. It has all the virtues of triode design—soundfield so dimensional it makes other tubed designs sound flat-chested—and few of the shortcomings, though it will run out of power in the fundamentals at the very bottom if you put the pedal to the floor. And, methinks, its tip-top octave is a bit muted and soft. But what it has, as few other designs of any kind have, is authority. Review in the works.

**Western Electric Type WE97-A (triodes)**
**$90,000 the pair**
[western-electric.com](http://www.western-electric.com)

This amplifier has taken triode design to what seems, for now, its outer limits, with eight 300B tubes per amp, and a rated power happily in excess of 100 watts. It has all the virtues of triode design—soundfield so dimensional it makes other tubed designs sound flat-chested—and few of the shortcomings, though it will run out of power in the fundamentals at the very bottom if you put the pedal to the floor. And, methinks, its tip-top octave is a bit muted and soft. But what it has, as few other designs of any kind have, is authority. Review in the works.

**Joule Electra Destiny VZN-350 OTL monoblocks**
**$30,000 the pair**
[joule-electro.com](http://www.joule-electro.com)

Speaking of authority, the Destiny amplifiers take everything that was true, faithful, and authoritative about Jud Barber’s Grand Marquis—amps and magnify these qualities. What is missing, as in some of Barber’s other designs, is an output transformer, whose absence makes for a triode-like benefit: removing a principal source of tube-amplification coloration from the circuit, and, in the case of Barber’s design, without serious sonic compromises. And this many-splendored tube design has enough power to drive anything to any level. Wait and see. Review to come.

**Joule Electra LA-150 Mk II**
**$5200**
[joule-electro.com](http://www.joule-electro.com)

A best buy in the increasingly pricey world of audio electronics. Its closest kin is the Audio Research sound of many moons ago, though here we find lower distortion, staggering bass, and a more romantic (much more romantic) sound.

*See HP's Workshop, Issue 174*

**Burmester 011 preamplifier**
**$15,995**
[burmester.de](http://www.burmester.de)

A full-fledged preamplifier, with a quite good phonostage and sound in keeping with the quality that Burmester has achieved in its recent designs. That is to say, this thing is as close to neutral as I’ve heard in any solid-state design, a bit on the yang side, and still so transparent you might feel it’s one of those clear ways you can see forever (into the soundstage). Low distortion, superb bottom-octave response, and a sweet string sound. A keeper.

*See HP’s Workshop, Issue 165*

---

**LINESTAGES & A PREAMP**

**conrad-johnson Anniversary Reference Triode Mk III**
**$25,000**
[conrad-johnson.com](http://www.conrad-johnson.com)

Put plainly, a triumph. Here we have another design work-of-art that has progressed through three versions now, each with lower coloration and lower distortion, both improvements augmenting and allowing the linestage’s superior musicality to shine forth. State of the art.

*See HP's Workshop, Issue 165*

---

**AMPLIFIERS**

**Western Electric Type WE97-A (triodes)**
**$90,000 the pair**
[western-electric.com](http://www.western-electric.com)

This amplifier has taken triode design to what seems, for now, its outer limits, with eight 300B tubes per amp, and a rated power happily in excess of 100 watts. It has all the virtues of triode design—soundfield so dimensional it makes other tubed designs sound flat-chested—and few of the shortcomings, though it will run out of power in the fundamentals at the very bottom if you put the pedal to the floor. And, methinks, its tip-top octave is a bit muted and soft. But what it has, as few other designs of any kind have, is authority. Review in the works.

**Joule Electra Destiny VZN-350 OTL monoblocks**
**$30,000 the pair**
[joule-electro.com](http://www.joule-electro.com)

Speaking of authority, the Destiny amplifiers take everything that was true, faithful, and authoritative about Jud Barber’s Grand Marquis—amps and magnify these qualities. A best buy in the increasingly pricey world of audio electronics. Its closest kin is the Audio Research sound of many moons ago, though here we find lower distortion, staggering bass, and a more romantic (much more romantic) sound.

*See HP's Workshop, Issue 174*

**Burmester 011 preamplifier**
**$15,995**
[burmester.de](http://www.burmester.de)

A full-fledged preamplifier, with a quite good phonostage and sound in keeping with the quality that Burmester has achieved in its recent designs. That is to say, this thing is as close to neutral as I’ve heard in any solid-state design, a bit on the yang side, and still so transparent you might feel it’s one of those clear ways you can see forever (into the soundstage). Low distortion, superb bottom-octave response, and a sweet string sound. A keeper.

*See HP’s Workshop, Issue 165*
Wyetech Labs Sapphire (triode) amp
$7800 the pair [with 300B tubes]
wyetechlabs.com

If it’s the last word in sonic triode purity and wide frequency response you want, this 18-watt monoblock is the way to go. The bass is the best I’ve heard on any triode amp and the top end is extended and silvery. Now if only there were a high-efficiency speaker its equal.

Burmester 911 Mk III
$17,995
burmester.de

Given the prices, it’s hard to call anything from Burmester a best buy, but if you want a powerhouse of an amp that doesn’t sound one whit like transistors and that is a technological marvel, look no further. We have used it as a reference on virtually every speaker in the house and find no serious or even objectionable shortcomings. If you want a comparative sound from the U.S., in terms of purity and low coloration with a touch of yang, you’ll have to shop Spectral.

See HP’s Workshop, Issue 165

Antique Sound Labs Hurricane DT II mono-blocks
$6200 the pair
divertech.com

Recently updated and better than ever, this 200-watt monoblock design, even at a significant price increase (parts costs, it is said, are rising because of an expanding Chinese audio industry). Oh, yes, no belle curve in looks.

See HP’s Workshop, Issue 174

CD PLAYERS

EMM Labs CDSA CD/SACD player
$20,000
emmlabs.com

State of the art, period. Detailed comments to come.

47 Lab Model 4704 CD Transport pi/Tracer
$24,999
sakurasystems.com

See HP’s Workshop, Issue 163

Edge G CD Player
$3268
edgeamps.com

See HP’s Workshop, Issue 163

EAR Acute CD Player
$5494
info@ear-usa.com

These compact-disc players were reviewed in detail and with significant cross-comparisons in Issue 163 as part of an exploration of a new generation of digital playback gear that didn’t mimic analog sound with euphonic colorations but showed the strengths of digital itself. The 47 Lab was the most neutral and least colored. The reviews should be read in context.

See HP’s Workshop, Issue 163

MULTICHLANNEr GEAR

Edge GAV amplifier (as tested, six 500-watt modules)
$9750, six-channel version ($1250 per extra module)
edgeamps.com

Review to come.

EMM Labs CDSD SE disc transport/SACD player

$13,500
emmlabs.com

Review to come.

CABLES & A STAND

Nordost Odin cables and interconnects
Interconnects: $16,000 per pair, one meter ($2000 each extra half-meter pair)
Speaker cables: $20,000 per pair, one meter ($3000 each extra half-meter)
nordost.com

It’s saying a mouthful to call these, by far, the best Nordost cables of all, and they are priced so far out of sight as to require a financial telescope to find their orbits. Let’s hope the technology finds its way into some connectors less catastrophically expensive, so you can hear just how good these things are. (I am working on a comparison between these and the Valhallas, down the road.)

Kubala-Sosna Emotion Series cables and interconnects
$2700, one meter, speaker or interconnect (extra half meter pair $400)
kubala-sosna.com

If the Nordost prices drive you crazy, with the Kubala-Sosna you have connectors indistinguishable from the Valhallas in the middle frequencies, more romantic at either frequency extreme. Quite, quite lovely.

Halcyonics Micro 60 isolation sensing device
$10,400 (estimated)
Halcyonics Micro 40
$8700 (estimated)
halcyonics.com

Designed as platforms upon which to replace electronic microscopes, and high tech at its highest (comments to come), these Micros, large (60) and smaller (40), write the book on turntable and CD player isolation.

ACCESSORIES

I have omitted some accessories because I have written sneak previews of them before, in the last issue—the Audience AR line conditioner, the Hallograph soundstage tuning stalks, and the Stillpoint equipment isolators.

Coming Attractions

Several of the components I am presently evaluating would, at first blush, belong either on this list or in a future golden-ear issue. But by the time you read these choices, I will have a new generation of super-stuff upon which to report findings.

Mind you, I am not saying which are which, but these are currently in the works: The Reference 3a Grand Aveca speakers, the Lumen White speakers, the Scaena References, a new super cartridge from Clearaudio (their best in years), the Air Tight cartridge, the Vintage Audio redesigns of Stuart Hegeman’s classic Citation One and Two, the Antique Sound Labs deluxe Flora EX line stage, revised ASR electronics, and much much more. Wait and see. Write to me at HP’sAudioMall@aol.com.
